WHAT IS MACROECONOMICS?

The study of the Economy AS A WHOLE

- How do you know that the Economy is doing well?
- What is the role of Governments in the Economy?
- Which Tools do you use to answer these questions?

OPINION POLITICAL ECONOMICS

What Happens When Europeans Find Out How Poor They Are?

The Continent trails far behind U.S. economic output. Politics is bound to catch up sooner or later.

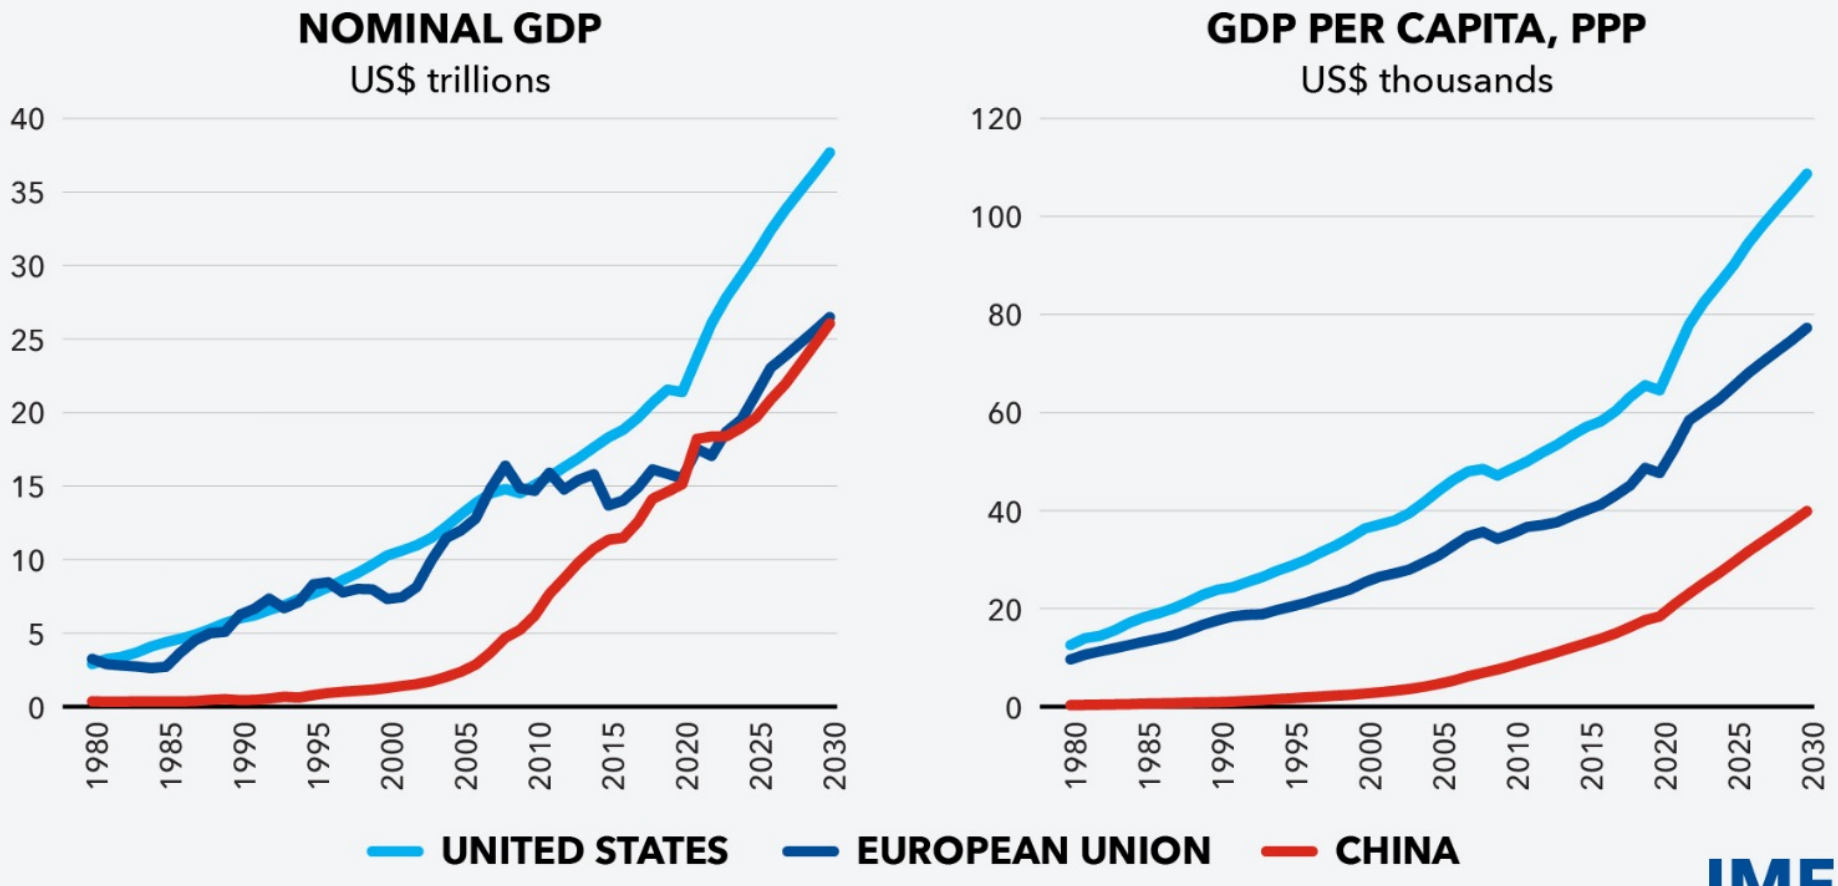

By Joseph C. Sternberg

April 30, 2026 1:43 pm ET

Do Europeans understand how poor they are? And what will happen when they find out? Those are the Continent's big political-economy questions for the next few years—perhaps decades.

The widening gap between American and European prosperity is among the most important facts of the global economy. The clearest manifestation is the chasm in per capita gross domestic product: $94,400 in the U.S., according to the International Monetary Fund, compared with $65,300 in Germany, $61,000 in the U.K. and $52,000 in France.
