MACROECONOMICS

Dual Degree in Business Administration & Data and Business Analytics
BBADBA SEP-2026 MACRO-NBDA.3.M.B

Area Economics
Number of sessions: 30
Academic year: 26-27
Degree course: THIRD
Number of credits: 6.0
Semester: 1º
Category: BASIC
Language: English

Professor: **PAULINA ELISA ETXEBERRIA GARAIGORTA**

E-mail: peetxeberria@faculty.ie.edu

Academic background:
PhD in Economics, European Doctor, UPV/EHU (Bilbao).
MPhil. Quantitative Finance, UCM (Madrid), UV (Valencia), UPV/EHU (Bilbao).
M.A. Business and Economics, University Pompeu Fabra (Barcelona).
Degree in Economics, UPV/EHU (Bilbao).
Research experience:
Researcher at Boston College (Boston), 2017.
Researcher at University of Pennsylvania (Philadelphia), 2007, 2011- 2013.
Researcher at European University Institute (Florence), 2009.
Researcher at UPV/EHU, 2005-2008, 2010-2011, 2013-2014.
She has addressed seminars and conferences at several institutions such as Symposium of Economic Analysis, Encuentros de Economía Aplicada, ASSET Annual Meeting, Symposium of Economic Theory and Applications, DEGIT Dynamics, Economic Growth and International Trade, All China (ACE) International Conference.
Her research has been published in scientific journals and books. She has been involved and has participated in several research networks and long-duration projects financed by the European Commission and the Spanish Ministry of Science and Innovation.
Teaching experience:
IE University, Undergraduate 2014-2026: Introduction to Economics, Microeconomics, Foundations of Macroeconomics, Macroeconomics, Global Economic Environment, Economics, Policy and Technology, Economic Growth and Inequality, Poverty and Inequality, IE Humanities, Advanced Macroeconomics, IE Challenge.

IE University, Graduate 2023-25: Master in Applied Economics, Master in Sustainability.
She has been awarded for “Good teaching Evaluations” for the years 2016-2017, 2017-2018, 2018-2019, 2019-2020, 2021-22, 2022-23, 2023-2024, 2024-2025 and 2025-26.
Brown University, 2020; 2022-2026: Principles in Economics.
UPV/EHU 2005-2011, 2013-2014: Macroeconomic Theory, Political Economy II, Finance, Asset Pricing, Introduction to Matlab.
IE University, 2017-2021: Final Project Advisor
IE University 2019-2023: Student supervisor
Consulting experience: She worked on research and international consulting services on innovation and urban growth and development in cities and regions.

Office Hours

Office hours will be on request. Please contact at:

peetxeberria@faculty.ie.edu

SUBJECT DESCRIPTION

Macroeconomics is the branch of economics that studies the behavior of the economy as a whole, treating it as a single aggregate. It seeks to identify the factors that make a country's economy dynamic and healthy, as well as those that explain the difficulties and instability sometimes experienced by others. A healthy economy can be characterized by steady economic growth, full employment, low and stable inflation, sound public finances, and a balanced external sector.

Macroeconomics helps us understand, prevent, and counteract the causes of low growth, high unemployment, pronounced business cycle fluctuations, and imbalances in the public and external sectors. Understanding these issues provides the foundation for analyzing the potential role of governments in improving economic performance through public policy, as well as for assessing the possible consequences of inadequate macroeconomic policies.

Prevailing and expected aggregate economic conditions are key considerations in business decision-making. A favorable macroeconomic environment is a prerequisite for the success of entrepreneurial projects and for achieving reasonable returns on financial investments. This course provides students with the fundamental tools needed to understand real-world economic developments and their implications for business activity. It also aims to develop students' ability to critically assess economic conditions and macroeconomic policies.

LEARNING OBJECTIVES

Upon successful completion of this course, students should be able to analyze and interpret current economic developments, assess the overall state of an economy, identify the factors underlying strong or weak economic performance, and critically evaluate the macroeconomic policies in place, which are often the subject of significant debate.

To achieve these objectives, the course develops a theoretical framework that explains the relationships among the main macroeconomic aggregates. Particular emphasis is placed on the practical implications of the underlying theory. The analytical treatment of core models is kept as simple and intuitive as possible, relying primarily on graphical analysis.

Within economic science, Macroeconomics remains one of the most debated fields, particularly with regard to the choice of a single theoretical framework capable of explaining real-world events. Students are introduced to the main schools of thought and encouraged to assess the practical relevance and limitations of different theoretical approaches.

Environmental, social, and governance (ESG) issues-both public and corporate-are incorporated into class discussions on economic performance and the role of governments in economic life. Students are encouraged to identify sustainability-related challenges, apply economic tools to analyze them, and use economic reasoning to evaluate appropriate policy responses.

TEACHING METHODOLOGY

IE University teaching method is defined by its collaborative, active, and applied nature. Students actively participate in the whole process to build their knowledge and sharpen their skills. Professor's main role is to lead and guide students to achieve the learning objectives of the course. This is done by engaging in a diverse range of teaching techniques and different types of learning activities such as the following:

Learning Activity	Weighting	Estimated time a student should dedicate to prepare for and participate in
Lectures	26.7 %	40.0 hours
Discussions	13.3 %	20.0 hours
Exercises in class, Asynchronous sessions, Field Work	13.3 %	20.0 hours
Group work	16.7 %	25.0 hours
Individual studying	30.0 %	45.0 hours
TOTAL	100.0 %	150.0 hours

AI POLICY

In this course, the use of generative artificial intelligence (GenAI) is encouraged, with the goal of developing an informed critical perspective on potential uses and generated outputs.

However, be aware of the limits of GenAI in its current state of development:

· If you provide minimum effort prompts, you will get low quality results. You will need to refine your prompts to get good outcomes. This will take work.

· Don't take ChatGPT's or any GenAI's output at face value. Assume it is wrong unless you either know the answer or can cross-check it with another source. You are responsible for any errors or omissions. You will be able to validate the outputs of GenAI for topics you understand.

· AI is a tool, but one that you need to acknowledge using. Failure to do so is in violation of academic honesty policies. Acknowledging the use of AI will not impact your grade.

Suggested format to acknowledge the use of generative AI tools:

I acknowledge the use of [AI systems link] to [specify how you used generative AI]. The prompts used include [list of prompts]. The output of these prompts was used to [explain how you used the outputs in your work].

If you have chosen not to include any AI generated content in your assignment, the following disclosure is recommended:

No content generated by AI technologies has been used in this assignment.

PROGRAM

SESSION 1 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

A Tour of the Course

Other / Complementary Documentation: Syllabus and Assigments Instructions (N/C)

SESSION 2 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Key Macroeconomic Indicators

Blanchard,O. (2025). Macroeconomics. Chapter 2.

SESSION 3 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Key Macroeconomic Indicators

Blanchard,O. (2025). Macroeconomics. Chapter 2.

SESSION 4 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Key Macroeconomic Indicators

Blanchard,O. (2025). Macroeconomics. Chapter 2.

SESSION 5 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand side: The Goods Market

Blanchard,O. (2025). Macroeconomics. Chapter 3.

SESSION 6 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand Side: the Goods market

Blanchard,O. (2025). Macroeconomics. Chapter 3.

SESSION 7 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand Side: the Goods market

Blanchard,O. (2025). Macroeconomics. Chapter 3.

SESSION 8 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand Side: the Goods market in an Open economy

Blanchard,O. (2025). Macroeconomics. Chapter 18.

SESSION 9 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand Side: The Demand for Money, The Financial Markets

Blanchard,O. (2025). Macroeconomics. Chapter 4.

SESSION 10 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Demand Side: The Demand for Money, The Financial Markets

Blanchard,O. (2025). Macroeconomics. Chapter 4.

SESSION 11 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Short run equilibrium in Goods and Financial Markets: The IS-LM Model

Blanchard,O. (2025). Macroeconomics. Chapter 5.

SESSION 12 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Short run equilibrium in Goods and Financial Markets: The IS-LM Model

Blanchard,O. (2025). Macroeconomics. Chapter 5.

SESSION 13 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Short run equilibrium in Goods and Financial Markets: The IS-LM Model

Blanchard,O. (2025). Macroeconomics. Chapter 5.

SESSION 14 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Short run equilibrium in Goods and Financial Markets: The IS-LM Model

Games & Simulations: European Monetary Union Policy Simulator (EEN090122-U-ENG-HTM)

Blanchard,O. (2025). Macroeconomics. Chapter 5.

SESSION 15 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Review

SESSION 16 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Midterm Exam I

SESSION 17 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Supply Side: The Labor Market

Blanchard,O. (2025). Macroeconomics. Chapter 7.

SESSION 18 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Supply Side: The Labor Market

Blanchard,O. (2025). Macroeconomics. Chapter 7.

SESSION 19 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Supply side: The Labor Market

Blanchard,O. (2025). Macroeconomics. Chapter 7.

SESSION 20 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Putting All Markets Together: AS - AD Model

Blanchard, 0. (2009). Macroeconomics. AD-AS model

SESSION 21 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Putting All Markets Together: AS - AD Model

Blanchard, 0. (2009). Macroeconomics. AD-AS model

SESSION 22 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Putting all Markets together: AD-AS model

Games & Simulations: Brazil. An economic simulator (EEN090109-U-ENG-HTM)

Blanchard, 0. (2009). Macroeconomics. AD-AS model

SESSION 23 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

Simulation: 10 Downing Street

Games & Simulations: Case: 10 Downing Street (EEN090064-U-ENG-HTM)

SESSION 24 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The economy in the long run: The Facts of Growth

Blanchard,O. (2025). Macroeconomics. Chapter 10.

SESSION 25 (LIVE IN-PERSON)

ESG in the context of Economic News Debate

The Economy in the Long Run: The Facts of Growth

Blanchard,O. (2025). Macroeconomics. Chapter 10.

SESSION 26 (LIVE IN-PERSON)

Course Project Presentations

SESSION 27 (LIVE IN-PERSON)

Course Project Presentations

SESSION 28 (LIVE IN-PERSON)

Course Project Presentations

SESSION 29 (LIVE IN-PERSON)

Course Project Presentations

SESSION 30 (LIVE IN-PERSON)

Midterm Exam II

EVALUATION CRITERIA

Disclaimer: The assessment method may be subject to modifications. Should changes occur, students will be notified on the first day of class and provided with a written document detailing the modifications.

You should obtain an average of 5 out of 10 between both midterm exams to pass the course.

criteria	percentage	Learning Objectives	Comments
Group Work	30 %		Learning Activities
Class Participation	10 %		Class Participation
Intermediate tests	60 %		Two Exams

RE-SIT / RE-TAKE POLICY

*Each student has **four chances** to pass any given course distributed over two consecutive academic years: ordinary call exams and extraordinary call exams (re-sits) in June/July.*

*Resits: Students failing the course in the ordinary call (during the semester) will have to **re-sit the exam in June/July**.*

*Those students who have **not complied with the 80% attendance rule during the semester will fail both calls** for this Academic Year (ordinary and extraordinary) and will have to re-take the course (i.e., re-enroll) the following Academic Year, by paying the corresponding extra cost.*

*The June/July re-sit exam will consist of a **comprehensive exam**. Your final grade for the course will depend on the performance in this exam only; continuous evaluation over the semester will not be taken into consideration. Students will have to achieve the minimum passing grade of 5 and can obtain a **maximum grade of 8.0 (out of 10.0)** in the re-sit exam.*

***Retakers**: Students who failed the subject in a previous Academic Year and are now re-enrolled as re-takers in a course will need to **check the syllabus of the assigned professor**, as well as contact the professor individually, regarding the specific evaluation criteria for them as retakers in the course during that semester (ordinary call of that Academic Year). The maximum grade that may be obtained in the retake exam (3rd call) is 10.0*

*Retake students in undergraduate programs are generally not required to attend classes; however, certain courses may still apply attendance requirements depending on the course methodology or specific learning objectives. **Attendance is NOT mandatory for retake students in Macroeconomics**. It's always the student's responsibility to make sure to check the syllabus for the specific conditions for retake students and to contact the professor at the start of the semester in order to find out what is required of him/her to best prepare for the retake and to pass the course. This is very important since each professor has his /her own specific requirements.*

MACROECONOMICS EXAMS INSTRUCTIONS

MACRO exams will **follow IEU Close-Book Exams – Policy** (available in Blackboard), prepared by Program Managers to ensure fair and ethical behavior on the part of all students. On top of those general instructions, some more specific rules will apply in this subject:

All exams will be **PRESENTIAL** with no possible exemptions. Students must be able to show their University ID. They must also **sign an attendance document** provided by the professor/invigilant. Failing to bring the ID will prevent from taking the exam, and failing to sign for attendance will be considered an absence and, therefore, the grade will be zero.

Computers/tablets must be connected to **IE University wifi** in order to be able to monitor, if necessary, the use of internet during the exam. Exams submitted from other connections will be turn down and graded with zero.

All electronic devices other than the laptop or tablet for the exam (smartwatches, cell phones, headphones, etc) should be put away and remain out of sight during the exam.

To ensure that no unethical behavior takes place, exams for will be given **either on paper format or proctored with Smowl**. If Smowl is used, students must make sure to have **all files, programs, and apps fully closed**. If some files, programs, or apps, are found opened, it will be assumed that the student is cheating, the grade will be zero, and the incident will be reported to the Ethics Committee. Smowl must be connected all through the exam, any technical disruptions should be immediately reported to the professor/invigilant. Working out the exam without proctoring, for any lapse of time, will be considered cheating.

For non-paper exams, the computer screen should visible and display a degree of brightness that allows the professor/invigilant to monitor the exam. If it is covered or shows excessive dimness, the student will be requested to change.

If students are allowed to leave the exam before everyone has finished, they must show proof of submission to the professor/invigilant (a square message generated once you fully submit).

Exam questions will be displayed one at a time with no backtracking allowed.
