SUBJECT DESCRIPTION

This course offers an introduction to Organizational Behavior, a field on human differences, emotions, perceptions, behaviors, and interactions within the context of work organizations. More specifically, the topics include personality, attitude, emotion, and motivation at the individual level, as well as leadership, communication, and conflict at the group/team level. This course addresses issues such as understanding individual differences, motivating employees with various needs, leading groups and teams, resolving conflicts in an organizational context and, eventually, building a high-growth and sustainable organization where people will flourish.

LEARNING OBJECTIVES

- Become a more confident, dynamic, and persuasive presenter.

Participants with successful completion of this course should achieve the following objectives:

1. Raise awareness and sensitivity regarding the impact of human-related issues in the workplace.
2. List basic organizational behavior principles and explain how these principles influence human behavior in the workplace.
3. Analyze individual human behavior by using knowledge of personality, attitudes, emotions, and motivations.
4. Understand group behavior elements, such as leadership, power, politics, communication, conflict, and negotiation.
5. Enhance critical thinking skills through case studies, class discussions, and group projects.

TEACHING METHODOLOGY

IE University teaching method is defined by its collaborative, active, and applied nature. Students actively participate in the whole process to build their knowledge and sharpen their skills. Professor's main role is to lead and guide students to achieve the learning objectives of the course. This is done by engaging in a diverse range of teaching techniques and different types of learning activities.

Learning Activity	Weighting	Estimated time a student should dedicate to prepare for and participate in
Lectures	15.0 %	15.0 hours
Discussions	10.0 %	10.0 hours
Exercises in class, Asynchronous sessions, Field Work	6.0 %	6.0 hours
Group work	30.0 %	30.0 hours
Individual studying	39.0 %	39.0 hours
TOTAL	100.0 %	100.0 hours

AI POLICY

In this course, **the use of generative artificial intelligence (GenAI) is encouraged**, with the goal of developing an informed critical perspective on potential uses and generated outputs.

However, be aware of the limits of GenAI in its current state of development:

- If you provide minimum effort prompts, you will get low quality results. You will need to refine your prompts to get good outcomes. This will take work.
- Don't take ChatGPT's or any GenAI's output at face value. Assume it is wrong unless you either know the answer or can cross-check it with another source. You are responsible for any errors or omissions. You will be able to validate the outputs of GenAI for topics you understand.
- AI is a tool, but one that you need to acknowledge using. Failure to do so is in violation of academic honesty policies. Acknowledging the use of AI will not impact your grade.

Suggested format to acknowledge the use of generative AI tools:

- I acknowledge the use of *[AI systems link]* to *[specify how you used generative AI]*. The prompts used include *[list of prompts]*. The output of these prompts was used to *[explain how you used the outputs in your work]*.
- If you have chosen not to include any AI generated content in your assignment, the following disclosure is recommended:
- No content generated by AI technologies has been used in this assignment.

EVALUATION CRITERIA

Disclaimer: The assessment method may be subject to modifications. Should changes occur, students will be notified on the first day of class and provided with a written document detailing the modifications.

Class Participation (individual): 20% of your grade. Class participation will be evaluated in all sessions. Everyone is expected to be prepared for each class and to be an active participant in class discussions. You are required to attend each one of the classes. Your participation grade will reflect my assessment of your total contribution to the learning environment. This includes not only the frequency of your contributions but also their quality. Participations are evaluated according to the following standard.

Quality includes among other things:

(1) share insightful experiences, ideas, and thoughts (e.g. sharpening key takeaways, conducting deep and relevant analysis; drawing on course materials and your own experience productively);

(2) ask questions that initiate deeper discussion;

(3) professionalism of your conduct when contributing to class discussion (showing respect and support to all section members and their class contributions, and practicing critical thinking.)

Group Presentation (in groups): 20% of your grade. You need to form a group within the first 2 weeks of the semester. Please refer to the Group Presentation Rubric for detailed information.

Midterm (individual): 20% of your grade. The midterm takes place in Session 7, covering all chapters learned from Session 1 to 6.

Final Exam (individual): 40% of your grade. The final exam takes place at the end of the course. Chapters covered in the midterm will *not* be tested in the final exam. The duration is 50 minutes. Please note that there is a minimal passing grade of 4 (out of 10) for the final exam. In case you receive a lower than 4 in the final exam you will automatically fail the course. Refer to the following information for resit/retake policy.

criteria	percentage	Learning Objectives	Comments
Class Participation	20 %		
Group Presentation	20 %		
Midterm	20 %		
Final Exam	40 %		

RE-SIT / RE-TAKE POLICY

*Each student has **four** chances to pass any given course distributed over two consecutive academic years: ordinary call exams and extraordinary call exams (re-sits) in June/July.*

***Resits:** Students failing the course in the ordinary call (during the semester) will have to re-sit the exam in June/July.*

*Those students who have not complied with the **80% attendance rule** during the semester will fail both calls for this Academic Year (ordinary and extraordinary) and will have to re-take the course (i.e., re-enroll) the following Academic Year, by paying the corresponding extra cost.*

*The June/July re-sit exam will consist of a comprehensive exam. Your final grade for the course will depend on the performance in this exam only; continuous evaluation over the semester will not be taken into consideration. Students will have to achieve the minimum passing grade of 5 and can obtain a maximum grade of **8.0 (out of 10.0)** in the re-sit exam.*

***Retakers:** Students who failed the subject in a previous Academic Year and are now re-enrolled as re-takers in a course will need to check the syllabus of the assigned professor, as well as contact the professor individually, regarding the specific evaluation criteria for them as retakers in the course during that semester (ordinary call of that Academic Year). The maximum grade that may be obtained in the retake exam (3rd call) is 10.0*

*Retake students in undergraduate programs are **generally** not required to attend classes; **however, certain courses may still apply attendance requirements depending on the course methodology or specific learning objectives**. Each syllabus clearly indicates whether attendance is mandatory or not for retake*

students. Therefore, it's always the student's responsibility to make sure to ***check the syllabus for the specific conditions for retake students*** *and to* ***contact the professor at the start of the semester*** *in order to find out what is required of him /her to best prepare for the retake and to pass the course. This is very important since each professor has his/her own specific requirements.*
