ORGANIZATIONAL BEHAVIOR SESSIONS SCHEDULE / BBADBA SEP-2026 / SECTION 3.M.B

Session	Mode	Date	Starts	Ends	Room	Topic	Book Chapters	Exam Coverage
PART 1: INTRODUCTION								
Session 1	Live in-person	11/09/26	19:00	20:30	IE Tower	Introduction to Organizational Behavior	Chapter 1	—
PART 2: THE INDIVIDUAL								
Session 2	Live in-person	14/09/26	16:00	17:30	IE Tower	Personality and Individual Differences	Chapter 5	Midterm: 5.2, 5.3, 5.4
Session 3	Live in-person	28/09/26	16:00	17:30	IE Tower	Job Attitudes	Chapter 3	Midterm: 3.1, 3.4
Session 4	Asynchronous (1 day)	01/10/26	—	—	—	Emotions and Moods	Chapter 4	—
Session 5	Live in-person	05/10/26	16:00	17:30	IE Tower	Motivation Concepts	Chapter 7	Midterm: 7.2, 7.3, 7.5
Session 6	Asynchronous (1 day)	15/10/26	—	—	—	Motivation: From Concepts to Applications	Chapter 8	Midterm: 8.1
MIDTERM AND GROUP PROJECT WORKSHOP								
Session 7 - 8	Live in-person	19/10/26	14:30	17:30	IE Tower	MIDTERM EXAM + Group Project Workshop	Chapters 3, 5, 7, 8	See Midterm coverage slide
PART 3: DIVERSITY AND THE GROUP								
Session 9	Asynchronous (1 day)	22/10/26	—	—	—	Diversity, Equity and Inclusion in Organizations	Chapter 2	Final: 2.1, 2.2, 2.6
Session 10 - 11	Live in-person	26/10/26	14:30	17:30	IE Tower	Foundations of Group Behavior + Power and Politics	Chapters 9 & 13	Final: 9.1, 9.5, 9.7, 13.1, 13.2, 13.3
Session 12	Asynchronous (1 day)	05/11/26	—	—	—	Understanding Work Teams	Chapter 10	Final: 10.1, 10.2
PART 4: THE ORGANIZATION								
Session 13 - 14	Live in-person	16/11/26	14:30	17:30	IE Tower	Leadership + Organizational Culture	Chapters 12 & 16	Final: 12.1, 12.3–12.6, 16.1, 16.3, 16.4
Session 15 - 16	Live in-person	23/11/26	14:30	17:30	IE Tower	Organizational Change + Conflict and Negotiation	Chapters 16 & 14	Final: 14.1–14.4, 16.6, 16.7
PART 5: TEAM PRESENTATIONS AND FINAL EXAM								
Session 17 - 18	Live in-person	30/11/26	14:30	17:30	IE Tower	Team Presentations	All course chapters	—
Session 19	Live in-person	02/12/26	15:00	16:30	IE Tower	Team Presentations (cont.) + Q&A for Final Exam	All course chapters	—
Session 20	Live in-person	16/12/26	14:00	15:30	TBC	FINAL EXAM	Chapters 2, 9, 10, 12, 13, 14, 16	See Final exam coverage slides

Teams 3MB (1 of 2)

TEAM 1

NICOLAS SEEBOLD DOMINGUEZ
nseebold.ieu2024@student.ie.edu

ALFONSO FERNÁNDEZ O´SULLIVAN
afernandez.ieu2024@student.ie.edu

WILLIAM CLAYTON GREEN
wcgre.exstudents2026@student.ie.edu

3MB – Team Presentation: Documentary Choices

ie UNIVERSITY

FROM EMOTIONS TO EMOTIONAL INTELLIGENCE

- EMOTIONAL INTELLIGENCE:
  - A person's ability to perceive emotions in the self and others, understand the meaning of those emotions, and regulate their own emotions accordingly.
  - The case FOR it: intuitive appeal, it predicts criteria that matter such as job performance, and it has a biological basis.
  - The case AGAINST it: the concept is defined too broadly, it is difficult to measure, and its validity is disputed. Know both sides — you will be asked about "EQ" in an interview before you are asked about anything else from this course.

- EMOTIONAL LABOR:
  - Expressing organizationally desired emotions during interpersonal transactions.
  - Surface acting is linked to emotional exhaustion and burnout; deep acting is not.
- EMOTION REGULATION
  - Is the trainable part: surface acting, deep acting, emotional suppression, cognitive reappraisal, social sharing, mindfulness.
  - Suppression is expensive and often ineffective. Reappraisal works.

WHAT YOU WILL APPLY IN YOUR DOCUMENTARY ANALYSIS

- **Your team presentation must cover Attitudes and Emotions. This is the standard I will grade against.**
  1. Identify at least one AFFECTIVE EVENT: something specific that happened at work, the emotional reaction it produced, and the job attitude or behavior that followed. Affective events theory is the backbone of a good analysis.
  2. Name the EMOTIONAL LABOR in the organization: who has to display what, and at what cost. Look for surface acting.
  3. Assess the EMOTION REGULATION of the key decision maker: which technique did they use, and did it help or harm?

- **Describe behavior and name the concept. Do not diagnose people. "The CEO is a narcissist" is not analysis; "the CEO's response to the recall is escalation of commitment under negative affect" is.**

Session 5:
Motivation Concepts

Organizational Behavior

Updated Nineteenth Edition, Global Edition

Chapter 7

Motivation concepts

Learning Objectives

7.1 Describe the three key elements of motivation.

7.2 Compare the early theories of motivation.

7.3 Contrast the elements of self-determination theory and goal-setting theory.

7.4 Understand the differences among self-efficacy theory, reinforcement theory, and expectancy theory.

7.5 Describe the forms of organizational justice, including distributive justice, procedural justice, informational justice, and interactional justice.

7.6 Identify the implications of employee job engagement for managers.

7.7 Describe how the contemporary theories of motivation complement one another.

MOTIVATION

Basic Distinctions on Motivation

Compare the Early Theories of Motivation (1 of 7)

Exhibit 7-1 Maslow's Hierarchy of Needs

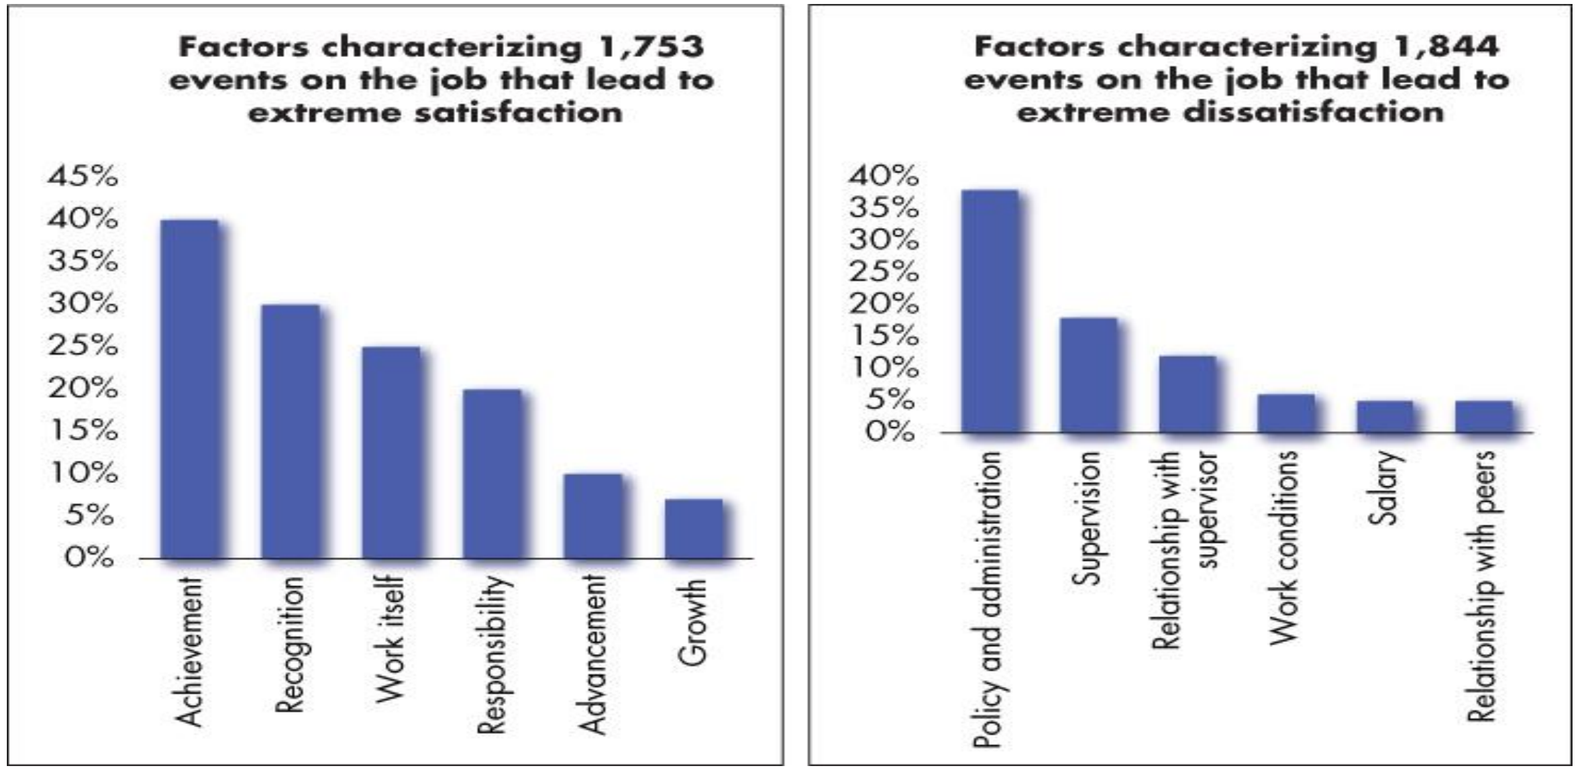

Compare the Early Theories of Motivation (2 of 7)

- Maslow's need theory has received wide recognition, particularly among practicing managers.
  - It is intuitively logical and easy to understand, and some research has validated it.
  - However, most research does not, and it hasn't been frequently researched since the 1960s.

Compare the Early Theories of Motivation (3 of 7)

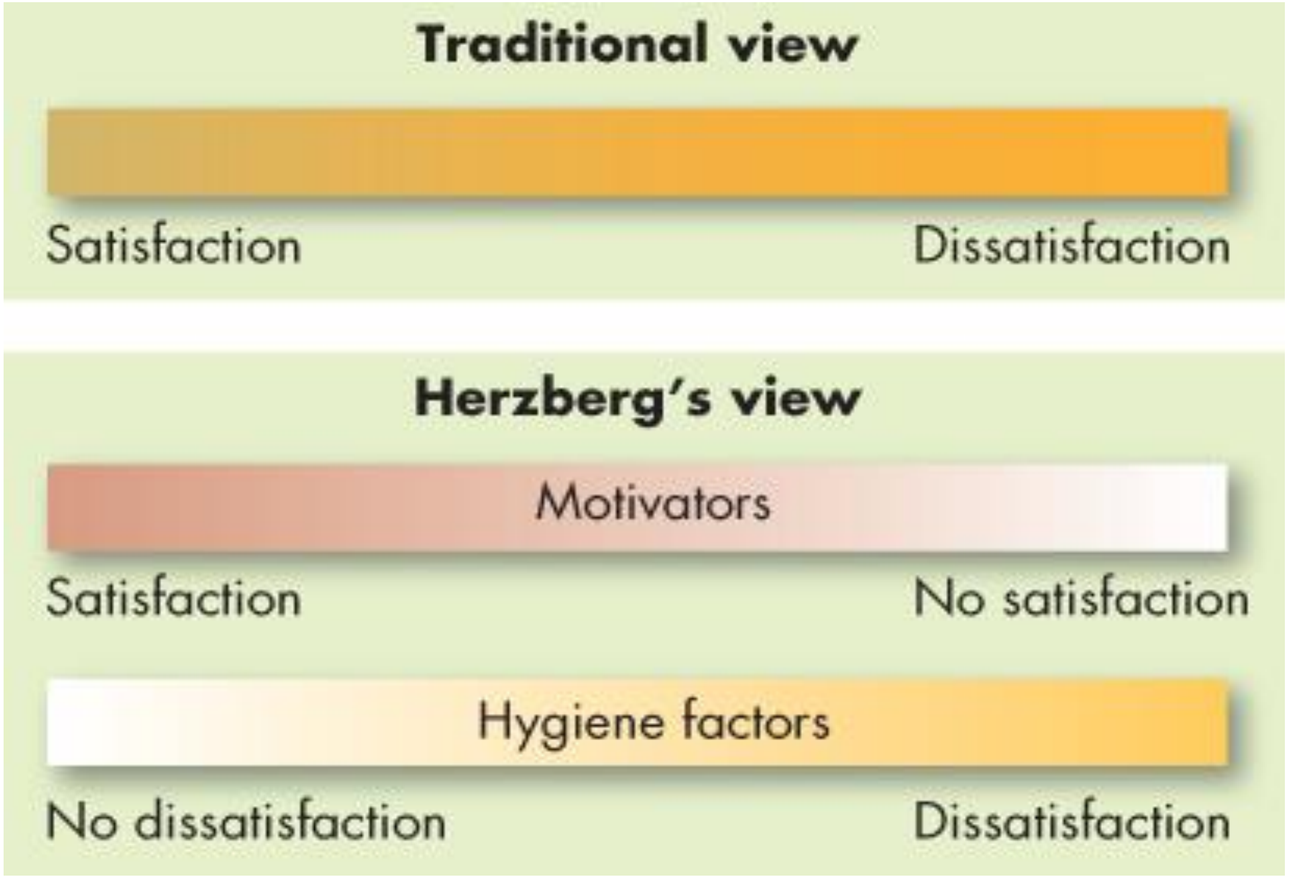

Exhibit 7-2 Comparison of **Satisfiers and Dissatisfiers**

Source: Based on Harvard Business Review, "Comparison of Satisfiers and Dissatisfiers," An exhibit from **One More Time: How Do You Motivate Employees? by Frederick Herzberg, January 2003**. Copyright © 2003 by the Harvard Business School Publishing Corporation. All rights reserved.

Compare the Early Theories of Motivation (4 of 7)

Exhibit 7-3 Contrasting View of **Satisfaction and Dissatisfaction**

- Managers who eliminate job dissatisfaction factors may not necessarily bring about motivation.
  - When **hygiene factors** are adequate, people will not be dissatisfied. Neither will they be satisfied.
  - To motivate people, managers must emphasize intrinsically rewarding factors that are associated with the work itself or to outcomes directly derived from it.

Compare the Early Theories of Motivation (5 of 7)

- Criticisms of Herzberg's theory:
  - Limited because it relies on self-reports.
  - Reliability of methodology is questioned.
  - No overall measure of satisfaction was utilized.

Compare the Early Theories of Motivation (6 of 7)

- **McClelland's Theory of Needs**
  - The theory focuses on three needs:
    - **Need for achievement** (nAch): drive to excel, to achieve in relation to a set of standards, to strive to succeed.
    - **Need for power** (nPow): need to make others behave in a way that they would not have behaved otherwise.
    - **Need for affiliation** (nAfl): desire for friendly and close interpersonal relationships.

Compare the Early Theories of Motivation (7 of 7)

- **McClelland's theory has had the best research support cross-culturally**
  - It has less practical effect than the others.
  - Because McClelland argued that the three needs are subconscious—we may rank high on them but not know it—measuring them is not easy.
  - It is more common to find situations in which managers aware of these motivational drivers, label employees based on observations made over time.

Self-Determination Theory vs. Goal-Setting Theory (1 of 9)

- **Self-Determination Theory**
  - People prefer to feel they have control over their actions.
    - Focus on the beneficial effects of intrinsic motivation and harmful effects of extrinsic motivation.
    - **Cognitive evaluation theory** - When people are paid for work, it feels less like something they *want* to do and more like something they *have* to do.
    - Proposes that in addition to being driven by a need for **autonomy**, people seek ways to **achieve competence (mastery)** and positive connections to others.

Self-Determination Theory vs. Goal-Setting Theory (2 of 9)

- **Self-Determination Theory**
  - When extrinsic rewards are used as payoffs for performance, employees feel they are doing a good job.
    - Eliminating extrinsic rewards can also shift an individual's perception of why they work on a task from an external to an internal explanation.
  - **Self-determination theory acknowledges that extrinsic rewards can improve even intrinsic motivation under specific circumstances:**
    - Deadlines and specific work standards do, if people believe they are in control of their behavior
    - Rewards and deadlines diminish motivation if people see them as coercive.

Self-Determination Theory vs. Goal-Setting Theory (3 of 9)

- **Self-Determination Theory**
  - What does self-determination theory suggest **for providing rewards**?

  - Self-concordance:
    - Recent outgrowth of SDT
    - Considers how strongly people's reasons for pursuing goals are consistent with their interests and core values.

      - If individuals pursue goals because of an intrinsic interest, they are more likely to attain their goals and are happy even if they do not.
      - The process of striving toward them is fun (hedonism)

Self-Determination Theory vs. Goal-Setting Theory (4 of 9)

- **Self-Determination Theory / Self-concordance**
  - What does all of this mean?

    - For individuals:
      - Choose your job for reasons other than extrinsic rewards.
        - » Employees who feel what they do is within their control and a result of free choice are likely to be more motivated by their work and committed to their employers.

    - For organizations:
      - Provide intrinsic as well as extrinsic incentives. They need to:
        - » make the work interesting,
        - » provide recognition,
        - » link organizational and employee goals, and support employee growth and development.

Self-Determination Theory vs. Goal-Setting Theory (5 of 9)

- Locke & Latham's Goal-Setting Theory
  - *Intentions to work toward a goal are a major source of work motivation*
    - *Goals tell an employee what needs to be done and how much effort is needed.*

- *Evidence suggests*:

  1. *Specific goals increase performance.*

  2. *Difficult goals, when accepted, result in higher performance than do easy goals.*

  3. *Feedback leads to higher performance than does non-feedback.*

Self-Determination Theory vs. Goal-Setting Theory (6 of 9)

- **Locke & Latham's Goal-Setting Theory**
  - Three other factors influencing the goals-performance relationship:

    4. *Goal commitment*
    5. *Task characteristics*
    6. *National culture*

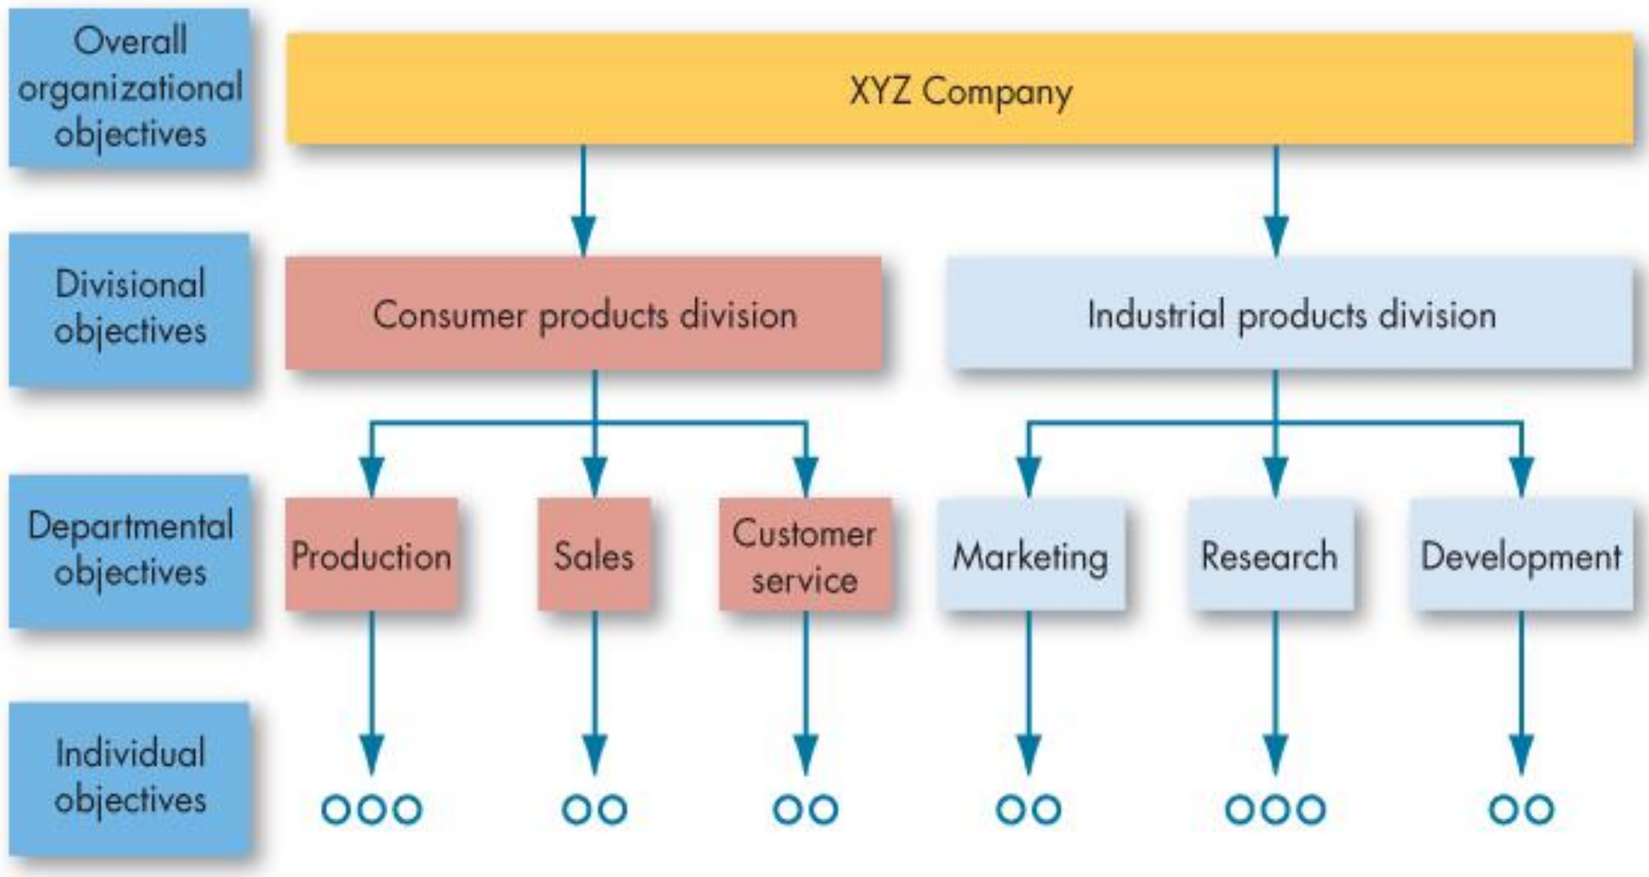

Self-Determination Theory vs. Goal-Setting Theory (7 of 9)

- Locke & Latham's Goal-Setting Theory
  - *"People differ in the way they regulate their thoughts and behaviors"*
    - Those with a ***promotion focus*** strive for advancement and accomplishment and approach conditions that move them closer toward desired goals.
    - Those with a ***prevention focus*** strive to fulfill duties and obligations and avoid conditions that pull them away from desired goals.
    - Which is the better strategy?

Self-Determination Theory vs. Goal-Setting Theory (8 of 9)

Locke & Latham's Goal-Setting Theory

Exhibit 7-4 Cascading of Objectives: *Management by Objectives* (MBO)

Self-Determination Theory vs. Goal-Setting Theory (9 of 9)

- Goal Setting and Ethics
  - **The relationship between goal setting and ethics is quite complex:**
    - *If we emphasize the attainment of goals, what is the cost?*
    - ***Time pressure** often increases as we are nearing a goal, which can tempt us to act unethically to achieve it.*
  - We may forgo mastering tasks and adopt avoidance techniques so we don't look bad, both of which can incline us toward unethical choices.

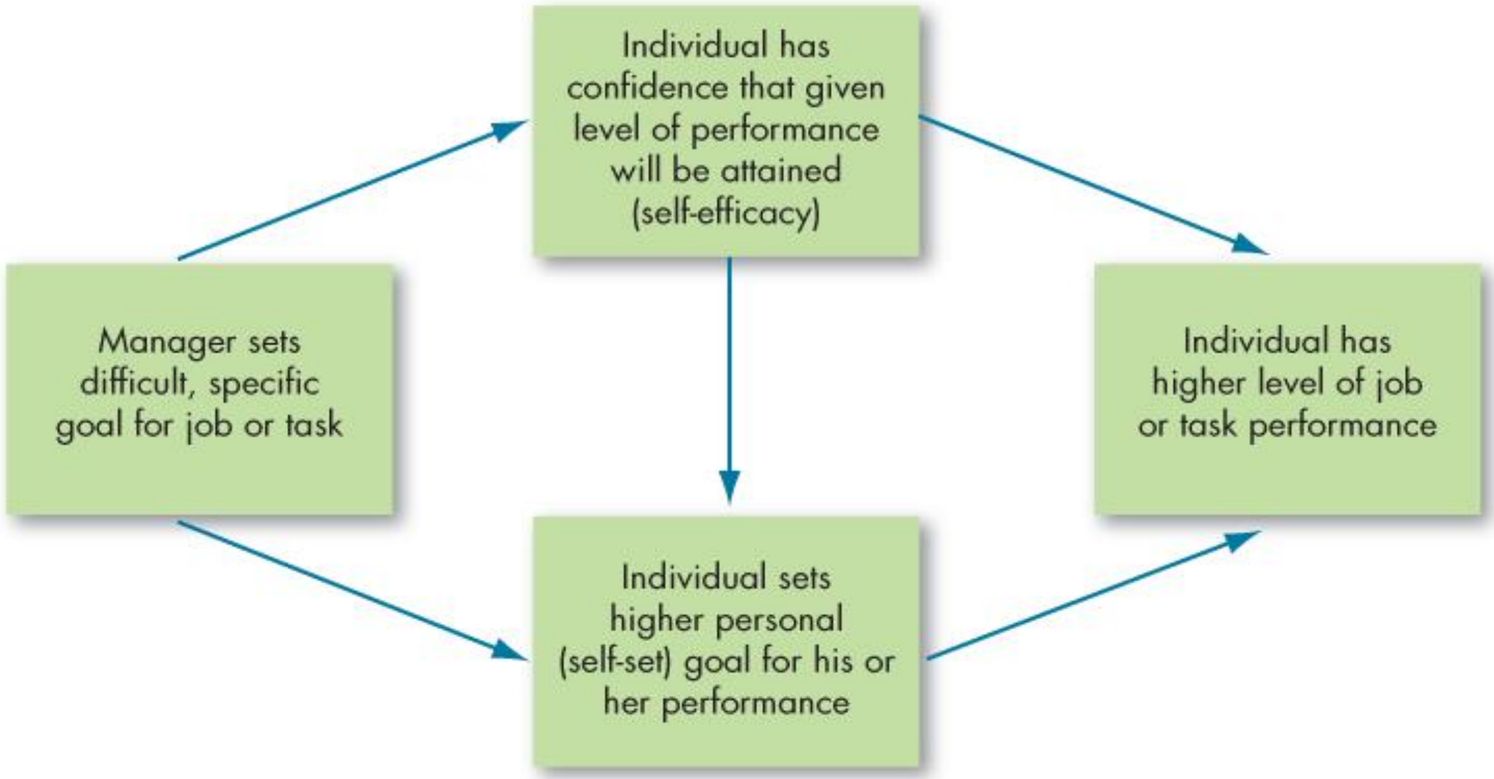

Self-Efficacy, Reinforcement, and Expectancy Theory
(1 of 8)

- **Self-efficacy theory** is *an individual's belief that they are capable of performing a task.*
  - Also known as ***social cognitive theory*** and ***social learning theory.***

1. **Enactive mastery:** gaining relevant experience with the task or job
2. **Vicarious modeling:** becoming more confident because you see someone else doing the task
3. **Verbal persuasion:** when a person is more confident because someone convinces them that they have the skills
4. **Arousal:** which leads to an energized state, driving a person to complete the task

Self-Efficacy, Reinforcement, and Expectancy Theory
(2 of 8)

Exhibit 7-5 Joint Effects of Goals and Self-Efficacy on Performance

Source: Based on E. A. Locke and G. P. Latham, "Building a Practically Useful Theory of Goal Setting and Task Motivation: A 35-Year Odyssey," *American Psychologist* (September 2002): 705–17.

Self-Efficacy, Reinforcement, and Expectancy Theory
(3 of 8)

- Implications of self-efficacy theory:
  - **The Pygmalion effect:**
    - **A form of self-fulfilling prophecy: believing in something can make it true.**
  - Training programs often make use of enactive mastery by having people practice and build their skills.

Self-Efficacy, Reinforcement, and Expectancy Theory
(4 of 8)

- Social-learning theory: *we can learn through both observation and direct experience.*
  - Models are central, and four processes determine their influence on an individual:
    - Attentional processes
    - Retention processes
    - Motor reproduction processes
    - Reinforcement processes

Self-Efficacy, Reinforcement, and Expectancy Theory
(5 of 8)

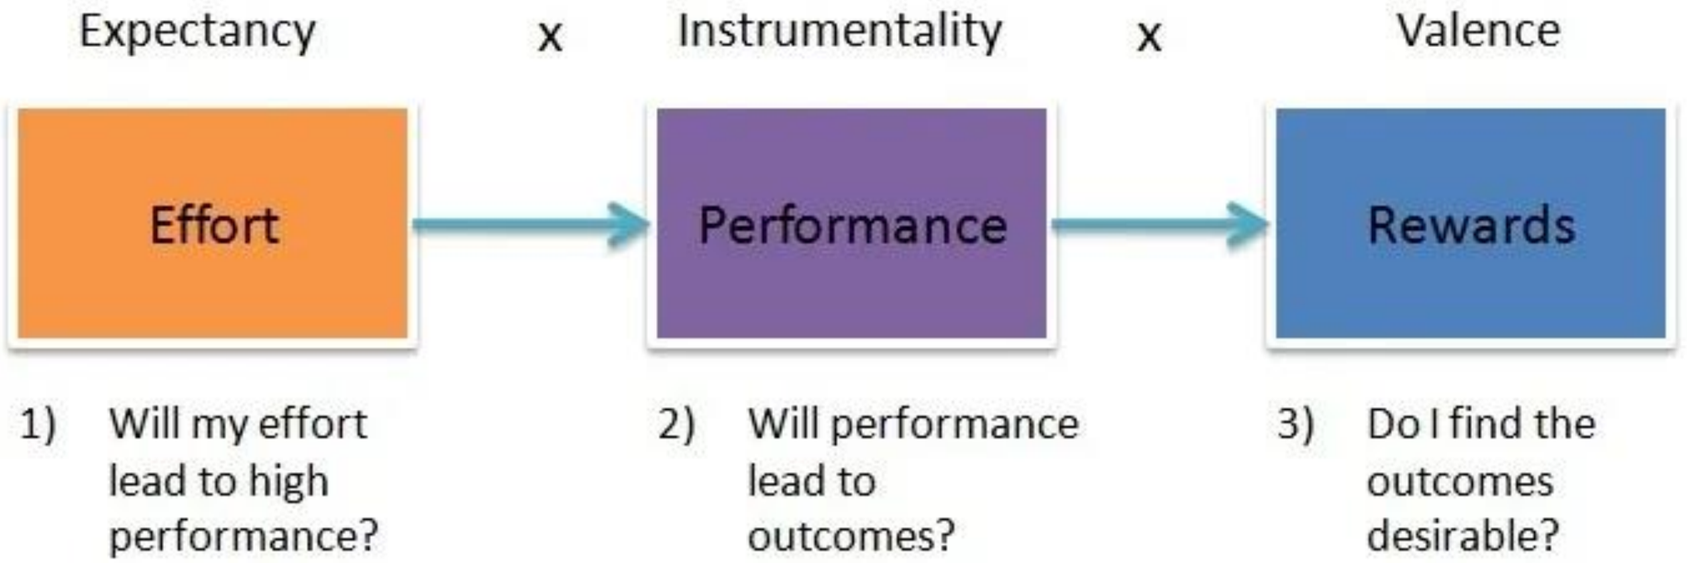

- **Reinforcement theory:** ***behavior is a function of its consequences.***
  - Reinforcement conditions behavior.
  - Behavior is environmentally caused.

- Goal setting is a cognitive approach: an individual's purposes direct their actions.

- **Operant conditioning theory:** *people learn to behave to get something they want or to avoid something they don't want.*
  - B.F. Skinner's **behaviorism.**

Self-Efficacy, Reinforcement, and Expectancy Theory
(6 of 8)

- Victor Vroom's Expectancy Theory predicts that *employees in an organization will be motivated when they believe that:*
  - *Putting in more effort will yield better job performance.*
  - *Better job performance will lead to organizational rewards, such as an increase in salary or benefits.*

Self-Efficacy, Reinforcement, and Expectancy Theory
(6 of 8)

- **Expectancy theory:** a tendency to act in a certain way depends on an expectation that the act will be followed by a given outcome and on the attractiveness of that outcome to the individual.

- Three relationships:
  - Effort-performance relationship
  - Performance-reward relationship
  - Rewards-personal goals relationship

Self-Efficacy, Reinforcement, and Expectancy Theory
(7 of 8)

Exhibit 7-6 Expectancy Theory

Self-Efficacy, Reinforcement, and Expectancy Theory
(8 of 8)

- **Expectancy theory helps explain why a lot of workers aren't motivated and do only the minimum.**
- Three questions employees need to answer in the affirmative if their motivation is to be maximized:

1. *If I give maximum effort, will it be recognized in my performance appraisal?*
2. *If I get a good performance appraisal, will it lead to organizational rewards?*
3. *If I'm rewarded, are the rewards attractive to me?*
