BBADBA SEP-2026 OBn-NBDA. 3.M.B

ORGANIZATIONAL BEHAVIOR

Professor Carmen Morales
October 26th, 2026

ie UNIVERSITY

ORGANIZATIONAL BEHAVIOR SESSIONS SCHEDULE / BBADBA SEP-2026 / SECTION 3.M.B

Session	Mode	Date	Starts	Ends	Room	Topic	Book Chapters	Exam Coverage
PART 1: INTRODUCTION								
Session 1	Live in-person	11/09/26	19:00	20:30	IE Tower	Introduction to Organizational Behavior	Chapter 1	—
PART 2: THE INDIVIDUAL								
Session 2	Live in-person	14/09/26	16:00	17:30	IE Tower	Personality and Individual Differences	Chapter 5	Midterm: 5.2, 5.3, 5.4
Session 3	Live in-person	28/09/26	16:00	17:30	IE Tower	Job Attitudes	Chapter 3	Midterm: 3.1, 3.4
Session 4	Asynchronous (1 day)	01/10/26	—	—	—	Emotions and Moods	Chapter 4	—
Session 5	Live in-person	05/10/26	16:00	17:30	IE Tower	Motivation Concepts	Chapter 7	Midterm: 7.2, 7.3, 7.5
Session 6	Asynchronous (1 day)	15/10/26	—	—	—	Motivation: From Concepts to Applications	Chapter 8	Midterm: 8.1
MIDTERM AND GROUP PROJECT WORKSHOP								
Session 7 - 8	Live in-person	19/10/26	14:30	17:30	IE Tower	MIDTERM EXAM + Group Project Workshop	Chapters 3, 5, 7, 8	See Midterm coverage slide
PART 3: DIVERSITY AND THE GROUP								
Session 9	Asynchronous (1 day)	22/10/26	—	—	—	Diversity, Equity and Inclusion in Organizations	Chapter 2	Final: 2.1, 2.2, 2.6
Session 10 - 11	Live in-person	26/10/26	14:30	17:30	IE Tower	Foundations of Group Behavior + Power and Politics	Chapters 9 & 13	Final: 9.1, 9.5, 9.7, 13.1, 13.2, 13.3
Session 12	Asynchronous (1 day)	05/11/26	—	—	—	Understanding Work Teams	Chapter 10	Final: 10.1, 10.2
PART 4: THE ORGANIZATION								
Session 13 - 14	Live in-person	16/11/26	14:30	17:30	IE Tower	Leadership + Organizational Culture	Chapters 12 & 16	Final: 12.1, 12.3–12.6, 16.1, 16.3, 16.4
Session 15 - 16	Live in-person	23/11/26	14:30	17:30	IE Tower	Organizational Change + Conflict and Negotiation	Chapters 16 & 14	Final: 14.1–14.4, 16.6, 16.7
PART 5: TEAM PRESENTATIONS AND FINAL EXAM								
Session 17 - 18	Live in-person	30/11/26	14:30	17:30	IE Tower	Team Presentations	All course chapters	—
Session 19	Live in-person	02/12/26	15:00	16:30	IE Tower	Team Presentations (cont.) + Q&A for Final Exam	All course chapters	—
Session 20	Live in-person	16/12/26	14:00	15:30	TBC	FINAL EXAM	Chapters 2, 9, 10, 12, 13, 14, 16	See Final exam coverage slides

TEAM PRESENTATION

Your 15 minutes' presentation should cover all the following topics:

Intro: Cover slide, Index and Documentary's topic brief presentation

Part 1: The People

Personality:

- Big 5
- MBTI
- Dark Triad

Attitudes:

- Affective,
- Cognitive,
- Behavioral.

Motivation:

- McClelland Needs
- Self-Determination Theory

Part 2: The Team

Diversity:

- **Are the two major forms of workplace diversity present? How?**
- **Does this organization/s manage diversity effectively? How?**

Group and Team Behavior

- **Is there a Work Group or Work Team?**
- **What type of team is there? Problem Solving? Self-Managed? Cross-Functional? Virtual? Multiteam System?**
- **Find out the Team Charter, the Team Composition, and the Team Processes.**

Part 3: The Organization

Leadership, Power and Politics:

Conflict Management Styles and Negotiation

Organizational Culture & Organizational Change

Closing: Lessons learned & main takeaways. Narrator bias.

Teams 3MB (1 of 2)

3MB – Team Presentation: Documentary Choices

ie UNIVERSITY

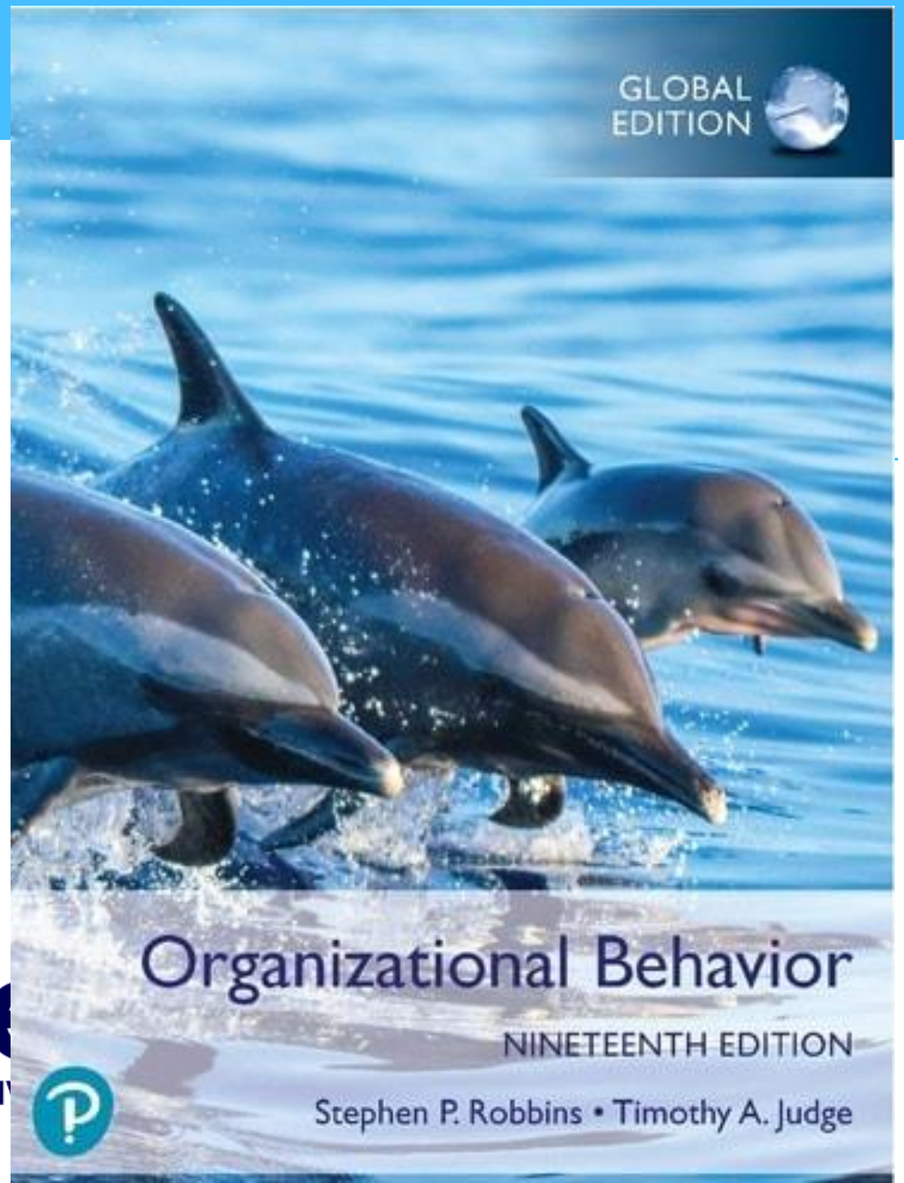

Session 10 – 11:
Foundations of Group Behavior
Understanding Work Teams

SESSIONS 13 – 14: F2F FEEDBACK ON YOUR ROUGH DRAFT

- **Sessions 13 – 14, Monday November 16: I will meet all 8 teams face to face and give you feedback on the rough draft of your team presentation on the documentary.**
  - 10 minutes per team, 80 minutes in total. We will start the double session with the team feedback and cover the Session 13 – 14 content in the second part.
  - That is two weeks before your final team presentations on November 30, time to act on the feedback, but only if the draft you bring is a real one.
- **This is feedback, not a grade. The more advanced your draft is, the more useful your 10 minutes will be.**
- **You will prepare it during the asynchronous Session 12. Work on it as a team, not individually.**
- What I will be looking at is the structure on the TEAM PRESENTATION slide:
  - Part 1: The People: this should already be complete.
  - Part 2: The Team: diversity, and the group and team behavior section (today's two chapters give you everything you need for it.)
  - Part 3: The Organization: an outline is enough at this stage.
- **Full details will be in the announcement for the asynchronous Session 12.**

Organizational Behavior

Updated Nineteenth Edition, Global Edition

Session 10 – Chapter 9

Foundations of Group Behavior

Learning Objectives

9.1 Distinguish between the different types of groups.

9.2 Describe the punctuated-equilibrium model of group development.

9.3 Show how role requirements change in different situations.

9.4 Demonstrate how norms exert influence on an individual's behavior.

9.5 Show how status and size differences affect group performance.

9.6 Describe how issues of cohesiveness and diversity can be integrated for group effectiveness.

9.7 Contrast the strengths and weaknesses of group decision making.

Distinguish Between Different Types of Groups (1 of 5)

- A group is defined as two or more individuals, interacting and interdependent, who have come together to achieve particular objectives.

- Groups can be either formal or informal:
  - **Formal groups:** those defined by the organization's structure
    - e.g. an airline flight crew
  - **Informal groups:** alliances that are neither formally structured nor organizationally determined
    - e.g. natural formations in the work environment in response to the need for social contact, three employees from different departments who regularly eat lunch together is an informal group.

Distinguish Between Different Types of Groups (2 of 5)

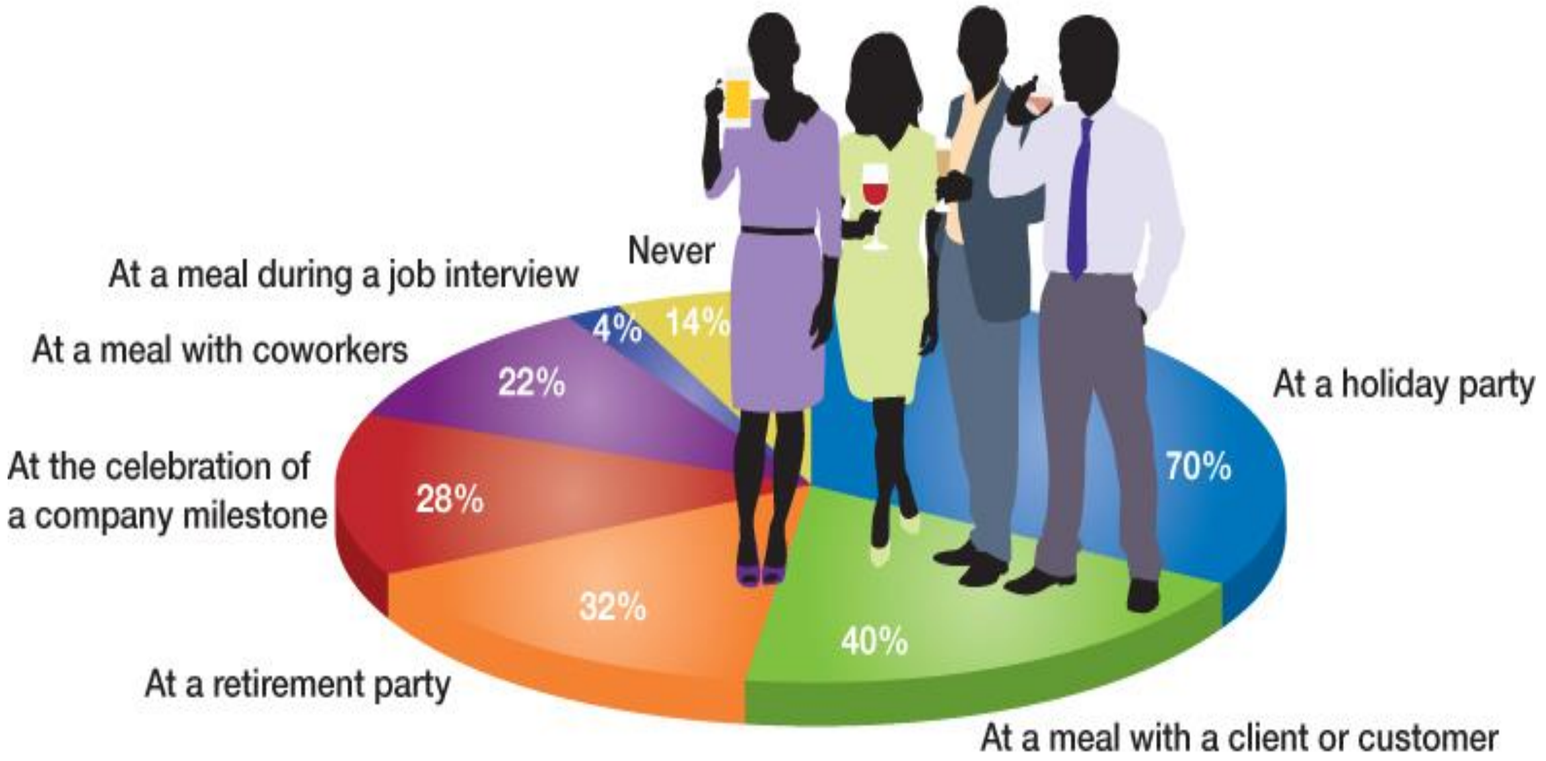

- *Why do people form groups?*
  - Our tendency to take personal pride or offense for the accomplishments of a group is the territory of *social identity theory*.

- Social Identity Theory: considers *when and why individuals consider themselves members of groups.*
  - People have emotional reactions to the failure or success of their group because *their self-esteem gets tied into the performance of the group*.

  - Social identities help us understand who we are and where we fit in with people.

Distinguish Between Different Types of Groups (3 of 5)

OB Poll Most People Report Drinking with Coworkers is Acceptable

Note: Society for Human Resources Management (SHRM) survey of 501 individuals and how drinking is viewed in their organization at a range of workrelated activities.

Source: Based on S. M. Heathfield, "To Drink or Not to Drink: Does Alcohol Drinking Mix Safely with Work Events?," *About.com Guide,* 2013, http://humanresources.about.com/od/networking/qt/drink_i3.htm.

Distinguish Between Different Types of Groups (4 of 5)

- Ingroups and Outgroups
  - Ingroup favoritism:
    - Probably the *biggest downside in social identities*
    - occurs when we see members of our group as better than other people, and people not in our group as all the same.
  - Whenever there is an ingroup, there is **by necessity an outgroup**
    - is sometimes everyone else,
    - usually an identified group known by the ingroup's members.

Distinguish Between Different Types of Groups (5 of 5)

- **Social Identity Threat**
  - Ingroups and outgroups pave the way for **social identity threat**, which is akin to stereotype threat.
  - **Individuals believe they will be personally negatively evaluated due to their association with a devalued group**, and they may lose confidence and performance effectiveness.

THE PUNCTUATED-EQUILIBRIUM MODEL (9.2)

- Temporary groups working to a deadline do not pass through the usual stages of development. They follow their own sequence:
  - The first meeting sets the group's direction.
  - The first phase is one of inertia: the group does comparatively little.
  - A transition takes place exactly when the group has used up half of its allotted time.
  - The transition triggers major changes: old patterns are dropped and new ones adopted.
  - A second phase of inertia follows the transition.
  - The group's last meeting is marked by markedly accelerated activity.

- **Translation for your presentation: you will do very little until around the second week of November, and then everything at once. That is not a character flaw, it is the model — and knowing it is what lets you move your own midpoint forward.**

ROLES AND THE PSYCHOLOGICAL CONTRACT (9.3, 1 of 2)

- **Role: a set of expected behavior patterns attributed to someone occupying a given position in a social unit.**
  - **Role perception**: your own view of how you are supposed to act in a given situation, learned from the stimuli around you (colleagues, friends, books, films.)
  - **Role expectations**: how OTHERS believe you should act in that same situation.

- The psychological contract: *the unwritten agreement between employee and employer that sets out mutual expectations — what management expects of you, and what you expect of management.*
  - It appears in no contract, and it governs most of what people feel about their job.
  - When it is broken, satisfaction, commitment and performance all fall immediately.

ROLE CONFLICT (9.3, 2 of 2)

- Role conflict: *when an individual faces divergent role expectations, so that complying with one makes complying with another more difficult.*
  - **Interrole conflict**: when the expectations of your different groups are in opposition. E.g.: the student who is also an employee and also a son or daughter meets this weekly.
  - Most employees belong simultaneously to an occupation, a work group, a division and several demographic groups, and those roles do not always agree with each other.

- The managerial move is not to remove the conflict: It is to make the expectations explicit.
  - Most role conflict is produced by assumptions nobody has ever said out loud.

NORMS AND CONFORMITY (9.4, 1 of 3)

- **Norms: acceptable standards of behavior within a group, shared by the group's members. They tell members what they ought and ought not to do in given circumstances.**
  - Norms cover performance, appearance, informal social arrangements and the allocation of resources. Almost none of them are written down anywhere.
  - Norms and emotions: norms can dictate what people are allowed to feel in a group, and how they are permitted to show it.

- **Conformity: adjusting your behavior to align with the norms of the group. The groups you want to belong to (your reference groups) exert the strongest pull of all.**
  - **Asch's experiments**: asked to match the length of lines, around a third of participants gave an answer they could plainly see was wrong, because everyone before them had said it.

DEVIANT WORKPLACE BEHAVIOR (9.4, 2 of 3)

  - A group with strong positive norms lifts behavior across an organization, which is what **corporate social responsibility** initiatives try to create.
  - A group with strong negative norms does the same in reverse, and deviance is contagious.

- **Deviant workplace behavior: voluntary behavior that violates significant organizational norms and, in doing so, threatens the well-being of the organization or its members.**
  - PRODUCTION: leaving early, working slowly on purpose, wasting resources.
  - PROPERTY: sabotage, lying about hours worked, stealing from the organization.
  - POLITICAL: showing favoritism, gossiping and spreading rumors, blaming coworkers.
  - PERSONAL AGGRESSION: harassment, verbal abuse, stealing from coworkers.

- **People who are socially isolated are more likely to engage in it. People in groups where it is normal are far more likely still. The group predicts it better than the person does.**

NORMS AND CULTURE (9.4, 3 of 3)

- Do people in *collectivist* cultures have different norms from people in individualist cultures?
  - Yes. Collectivists are more likely to conform to group norms, and they experience stronger pressure to do so.
  - The effect is not only national. Anyone socialized into a strong team culture conforms more inside it, wherever they are from.
- For a manager working across countries: silence in a meeting means different things in different places. Do not read agreement into it.

Show How Status and Size Differences Affect Performance (1 of 3)

- Status: a socially defined position or rank given to groups or group members by others.
  - **Status characteristics theory:** status is derived from one of three sources:
    1. The power a person wields over others → Legitimate
    2. A person's ability to contribute to a group's goals → Expert
    3. An individual's personal characteristics → Referent

Show How Status and Size Differences Affect Performance (2 of 3)

- **Status and Norms:**
  - Can influence behavior in organizations
  - high status individuals often have more freedom to deviate from norms.
- **Status and Group Interaction:**
  - high status people are often more assertive.
  - Status differences can inhibit the diversity of ideas and creativity.
  - lower-status members tend to be less active.
- **Status Inequity:**
  - perceived inequity creates disequilibrium and can lead to resentment and corrective behavior.
  - Managers who occupy central positions in their social networks are typically seen as higher in status by their subordinates, and this position translates into greater influence over the group's functioning.
- **Status and Stigmatization:**
  - stigma by association.
- **Group Status:**
  - "us and them" or "us versus them" mentality and ensuing polarization.

Show How Status and Size Differences Affect Performance (3 of 3)

- **Group size** affects the group's overall behavior.
  - Large groups are good for gaining diverse input.
  - Smaller groups are better doing something with input.

- **Social loafing:**
  - the tendency for individuals to expend less effort when working collectively than alone.

COHESION AND GROUP EFFECTIVENESS (9.6)

- **Cohesion: the degree to which group members are attracted to one another and motivated to stay in the group.**
  - Cohesion affects productivity, but the direction depends entirely on the group's performance norms:
    - High cohesion + high performance norms → HIGH productivity
    - High cohesion + low performance norms → LOW productivity
    - Low cohesion + high performance norms → MODERATE productivity
    - Low cohesion + low performance norms → LOW to moderate productivity

- **The dangerous cell is high cohesion with low performance norms: a group that likes each other and has silently agreed not to work hard. It is also the most pleasant cell to sit in, which is why it survives so long.**
  - To increase cohesion: make the group smaller, build agreement on goals, increase time spent together, raise the group's status, stimulate competition with other groups, reward the group rather than the individual.

Group Decision Making Intro – Question for the class

- *Are group decisions better than those made by individuals alone?*
  - Strengths of group decision making
  - Weaknesses of group decision making

Group Decision Making (1 of 8)

- **Strengths of group decision making:**
  - More complete information and knowledge
  - Increased diversity of views
  - Increased acceptance of solutions

- **Weaknesses of group decision making:**
  - Time consuming
  - Conformity pressures
  - Dominance of a few members
  - Ambiguous responsibility

Group Decision Making (2 of 8)

- *Effectiveness* and *efficiency* of group decisions:
  - *Accuracy*
  - *Speed*
  - *Creativity*
  - *Acceptance*

Group Decision Making (3 of 8)

- **Groupthink:**
  - Is related to **norms and affects decision making**
  - Describes situations in which group pressures for ***conformity*** deter the group from critically appraising unusual, minority, or unpopular views.

- **Groupshift:**
  - Also known as ***group polarization***
  - a change between a group's decision and an individual decision that a member within the group would make.
  - Groups generally **shift toward a more extreme version of the group's original position**.

Group Decision Making (4 of 8)

- Most group decision making takes place in **interacting groups**
  - Members meet face-to-face and rely on both verbal and nonverbal interaction to communicate with each other.

- Interacting groups often ***censor themselves*** and pressure individual members ***toward conformity of opinion***.

Group Decision Making (5 of 8)

- **Brainstorming can overcome pressures for conformity.**
  - In a brainstorming session:
    - The group leader states the problem.
    - Members then “free-wheel” as many alternatives as they can.
    - No criticism is allowed.
    - One idea stimulates others, and group members are encouraged to “think the unusual.”

Group Decision Making (6 of 8)

- The nominal group technique:
  - Restricts discussion or interpersonal communication during the decision making process.
    - Group members are all physically present, but members operate independently.
    - Permits the group to meet formally but does not restrict independent thinking, as does the interacting group.
  - Nominal groups outperform brainstorming groups.

Group Decision Making (7 of 8)

- **Steps for a nominal group:**

  1. Each member independently writes down their ideas on the problem.
  2. After this silent period, each member presents one idea to the group.
  3. The ideas are discussed for clarity.
  4. Each group member rank-orders the ideas.
  5. The idea with the highest aggregate ranking determines the final decision.

Group Decision Making (8 of 8)

Exhibit 9-5 Evaluating Group Effectiveness

	Type of Group		
Effectiveness Criteria	**Interacting**	**Brainstorming**	**Nominal**
Number and quality of ideas	Low	Moderate	High
Social pressure	High	Low	Moderate
Money costs	Low	Low	Low
Speed	Moderate	Moderate	Moderate
Task orientation	Low	High	High
Potential for interpersonal conflict	High	Low	Moderate
Commitment to solution	High	Not applicable	Moderate
Development of group cohesiveness	High	High	Moderate

IMPLICATIONS FOR MANAGERS - GROUPS

- Members must identify with the group. You cannot expect contribution from people who do not see themselves as part of it.
- Create role clarity by aligning role expectations with role perceptions, and by saying the expectations out loud.
- Norms exert a powerful influence and often operate without anyone being aware of them. Watch what your group rewards and what it punishes.
- Size the group for the task, to avoid social loafing.
- **Build cohesion, but only alongside high performance norms, never on its own.**
- When conformity pressure is the risk, use the nominal group technique rather than an open discussion.

Organizational Behavior

Updated Nineteenth Edition, Global Edition

Session 11 – Chapter 10

Understanding Work Teams

ie UNIVERSITY

Learning Objectives

10.1 Contrast groups and teams.

10.2 Contrast the five types of team arrangements.

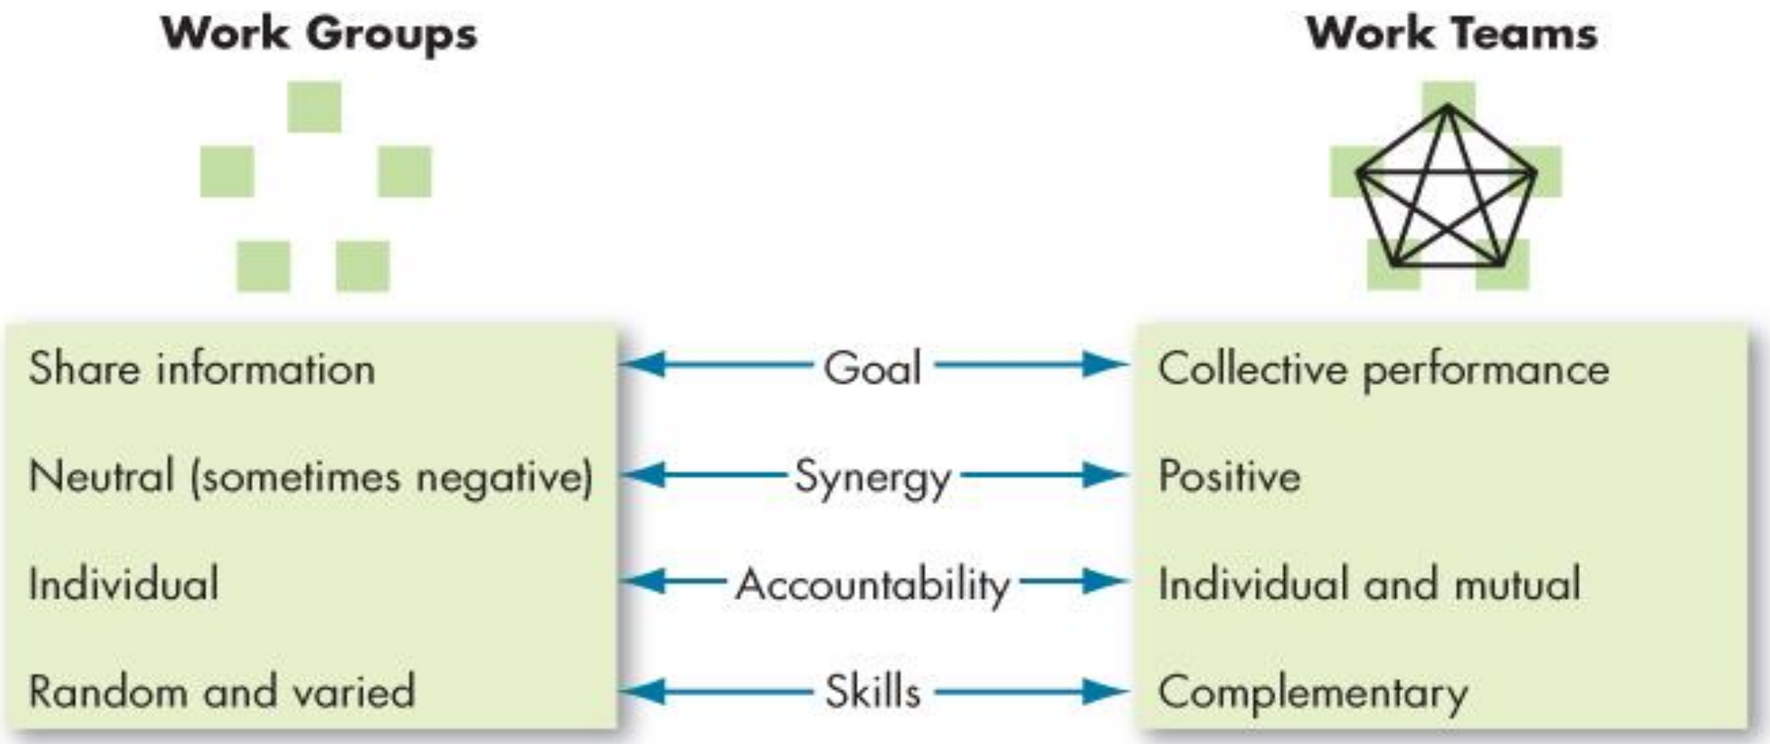

10.3 Identify the characteristics of effective teams.

10.4 Explain how organizations can create team players.

10.5 Decide when to use individuals instead of teams.

Differences Between Groups and Teams

Exhibit 10-1 Comparing Workgroups and Work Teams

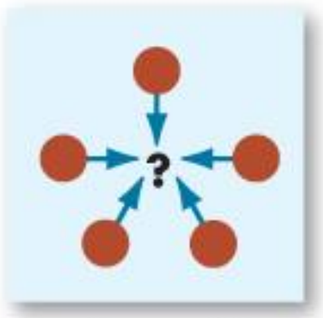

A *work group* interacts primarily to share information and make decisions to help members perform within their area of responsibility

A *work team* generates positive synergy through coordinated effort. Individual efforts result in a level of performance that is greater than the sum of those individual inputs.

Contrast the Five Types of Teams

Exhibit 10-2 Four Types of Teams

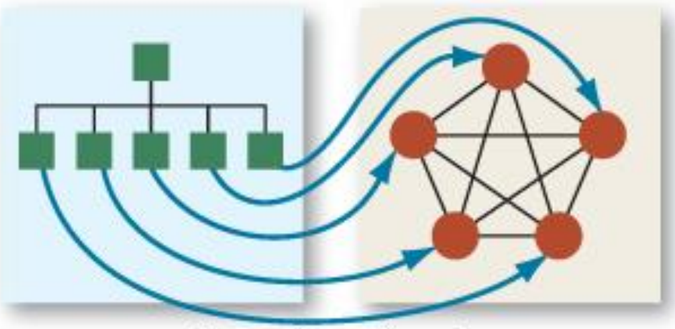

Problem-solving

In the past, teams were typically composed of 5–12 hourly employees from the same department who met for a few hours each week to discuss ways of improving quality, efficiency, and the work environment. These problem-solving teams rarely had the authority to implement their suggested actions.

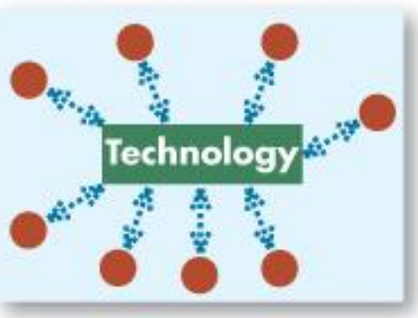

Self-managed

Teams of employees who perform highly related or interdependent jobs and take on many of the responsibilities of supervisors.

Cross-functional

Made up of employees from about the same hierarchical level but different work areas, who come together to accomplish a task.

Virtual

Teams of employees that use computer technology to tie together physically dispersed members in order to achieve a common goal.

Multiteam systems are collections of two or more interdependent teams that share a superordinate goal – they are a team of teams.

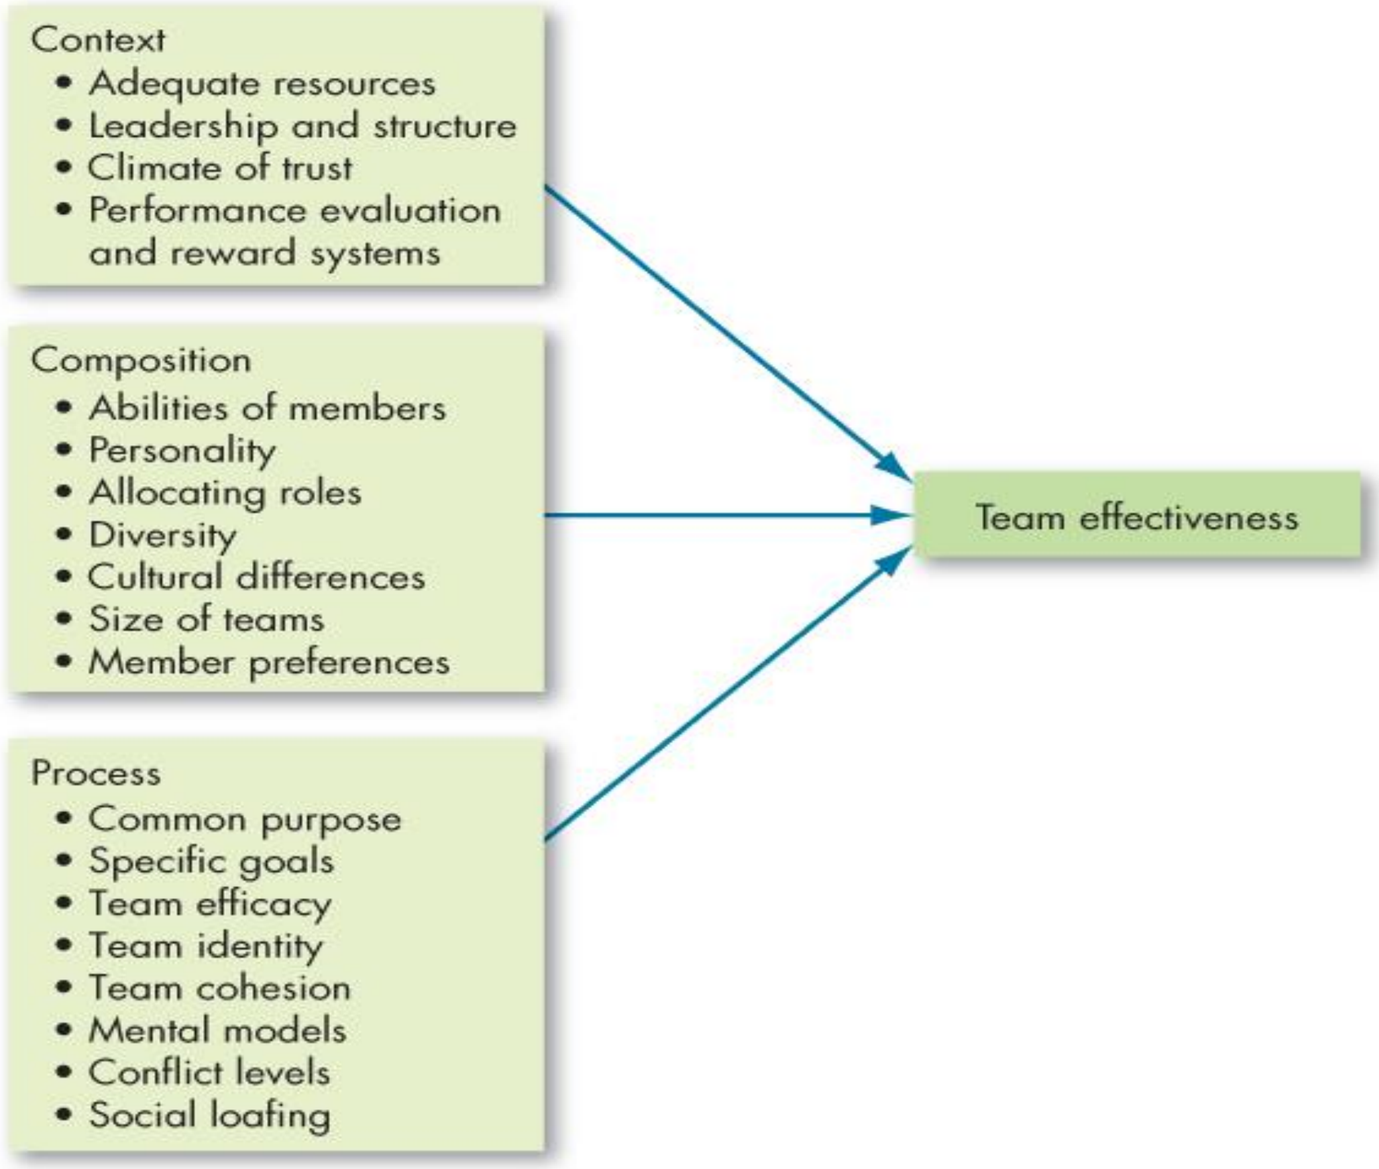

THE FIVE TYPES OF TEAM ARRANGEMENTS (10.2)

- **PROBLEM-SOLVING TEAMS**: five to twelve employees from the same department, meeting a few hours a week to discuss improving quality, efficiency and the work environment. They recommend; they rarely have authority to implement.
- **SELF-MANAGED WORK TEAMS**: typically ten to fifteen people who take on their former supervisor's responsibilities, planning and scheduling work, assigning tasks, controlling the pace, making operating decisions. The evidence on their effectiveness is mixed.
- **CROSS-FUNCTIONAL TEAMS**: employees at a similar hierarchical level but from different work areas, brought together to accomplish a task. Effective on complex problems, and slow in the early stages while trust is built.
- **VIRTUAL TEAMS**: teams that use technology to tie together physically dispersed members. They need deliberate effort on trust, on monitoring progress, and on making the team's work visible to the organization.
- **MULTITEAM SYSTEMS**: a collection of two or more interdependent teams that share at least one common goal. A team of teams, and leadership of the whole system, not of each team, is what decides whether it works. It is the arrangement most large organizations are actually running.

Identify the Characteristics of Effective Teams (1 of 6)

Exhibit 10-3

Team Effectiveness Model

Identify the Characteristics of Effective Teams (2 of 6)

- **Team Context:**
  - *What factors determine whether teams are successful?*

1. Adequate Resources
2. Leadership and Structure
3. A Climate of **Trust**
4. Performance Evaluations and Rewards

- **A Team Charter:**
  - Outlining why the team has been brought into the project, what the team is being tasked to accomplish and the resources and constraints in which the team will be working.

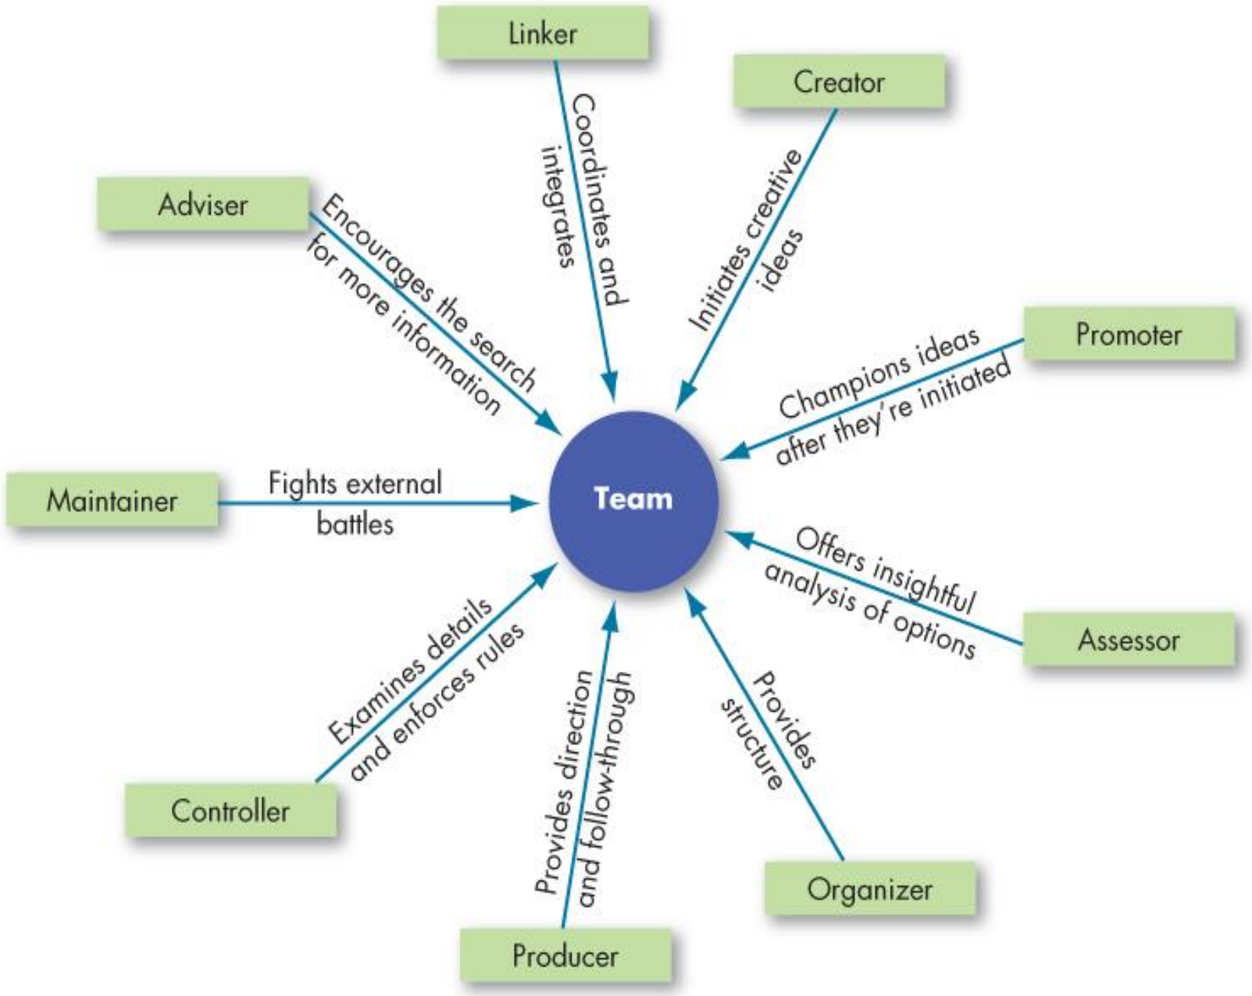

Identify the Characteristics of Effective Teams (3 of 6)

- **Team Composition:** ***How should teams be staffed?***

1. **Abilities of members**:
   - Hard Skills (Skills & knowledge)
2. **Personality:**
   - Big 5 Model
3. **Allocating roles:**
   - Soft Skills (the individual strengths that each person can bring to a team)
4. **Diversity** and **Organizational demography**
5. **Cultural differences:**
   - Cultural diversity = an asset for tasks that call for a variety of viewpoints
   - Culturally heterogeneous teams have more difficulty learning to work with each other and solving problems.
6. **Size of teams:**
   - The most effective teams have 5 to 9 members
7. **Member preferences:**
   - High performing teams are likely to be composed of people who prefer working as part of a group.

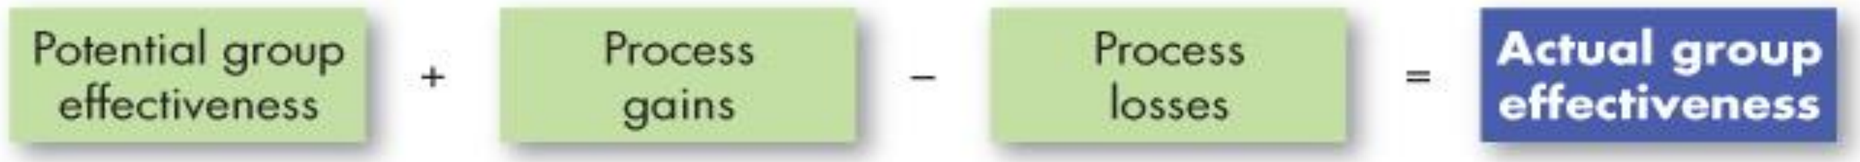

Identify the Characteristics of Effective Teams (4 of 6)

Exhibit 10-4 Key Roles of Teams

Identify the Characteristics of Effective Teams (5 of 6)

Exhibit 10-5 Effects of Group Processes

Identify the Characteristics of Effective Teams (6 of 6)

- Team Processes

1. Begin with a Common Plan and Purpose:
   - *Reflexivity*: Effective teams reflect on and adjust their master plan when necessary;
2. Specific Goals:
   - Translate their common purpose into specific, measurable, and realistic performance goals;
3. Team Efficacy
   - Effective teams have confidence in themselves and believe they can succeed;
4. Team Identity:
   - Positive T.I. can be conquered by recognizing individuals' specific skills and abilities, and creating a climate of respect and inclusion and improve team outcomes;
5. Team Cohesion:
   - Team members are emotionally attached to one another and motivated toward the team because of their attachment;
6. Mental Models:
   - Organized mental representations of the key elements within a team's environment that team members share;
7. Conflict Levels:
   - To stimulate discussion, promote critical assessment of problems and options, and can lead to better team decisions
8. Social Loafing:
   - Effective teams undermine this tendency by making members individually and jointly accountable for the team's purpose, goals, and approach.

TEAM STATES (10.3)

- **Team states** are the **shared attitudes and feelings that develop as a team works together. They shape performance as much as the processes do.**
  - MOTIVATION: the team's collective drive to accomplish the task.
  - TEAM EFFICACY: the shared belief that the team can succeed. Success produces it, and it then produces more success.
  - TEAM IDENTITY: how far members feel the team is part of who they are. Strong identity means better performance and more satisfied members.
  - TEAM COHESION: members emotionally drawn to one another and committed to staying.
  - TEAM TRUST: willingness to be vulnerable to the actions of the other members. The hardest to build and the quickest to lose.

HOW ORGANIZATIONS CREATE TEAM PLAYERS (10.4)

- **SELECTING:** hire for the interpersonal skills that teamwork requires, not only the technical ones. Some organizations use cluster hiring - recruiting a group of people together rather than one at a time.
- **TRAINING:** teamwork skills can be developed. Workshops on problem solving, communication, negotiation, conflict management and coaching produce measurable improvement.
- **REWARDING:** if the reward system recognizes only individual contribution, you will get individual behavior whatever you say about teamwork.

- **The honest summary**: organizations ask for teamwork and pay for individual performance, and then wonder why they do not get teams.

WHEN TO USE INDIVIDUALS INSTEAD OF TEAMS (10.5)

- Teams are not free. They cost more time and more coordination than individual work, and they are not always better.

- Three questions before you form one:
  1. Can the work be done better by one person? If the task can be completed without input from others, an individual is the right choice.
  2. Does the work create a common purpose or set of goals for the group that is more than the sum of individual goals?
  3. Are the members genuinely interdependent? Does the success of each depend on the success of the whole?

- If any answer points away from a team, you are about to pay the full cost of a team without receiving its benefit.

IMPLICATIONS FOR MANAGERS - TEAMS

- Start with the work to be accomplished, not with the team. Decide first whether the work needs a team at all.
- Create the context: adequate resources, effective leadership, a climate of trust, and a reward system that reflects team contributions.
- Keep team size small. Large teams are where social loafing lives.
- Diversity may hurt performance at first and help it later. Expect the growing pains instead of concluding that the team does not work.
- Team leaders should establish a common plan and purpose, and build team efficacy and a shared mental model.
- **Select, train and reward for teamwork. All three, or none of them work.**

WRAP-UP 1: WHAT TO STUDY FOR THE FINAL EXAM

- Five learning objectives from today's two chapters are on the final exam:
- 9.1 Distinguish between the different types of groups
  - Formal and informal groups; social identity; ingroup favoritism; social identity threat.
- 9.5 Show how group size affects group performance
  - Social loafing, why it happens, and what prevents it.
- 9.7 Contrast the strengths and weaknesses of group decision making
  - Accuracy against speed; groupthink and groupshift; interacting groups, brainstorming and the nominal group technique.
- 10.1 Contrast groups and teams
  - Synergy, mutual accountability and complementary skills — Exhibit 10-1.
- 10.2 Contrast the five types of team arrangements
  - Problem-solving, self-managed, cross-functional, virtual, and multiteam systems.
- Study from the Pearson e-text, Chapters 9 and 10. These slides compress the chapters; the e-text is the source.

WRAP-UP 2: WHAT TO USE FOR YOUR DOCUMENTARY

- **Part 2 – The Team: the group and team behavior questions you now have to answer**
  - Is there a work group or a work team? Apply the synergy and accountability test, not the label people in the documentary use.
  - Which of the five arrangements is it: problem-solving, self-managed, cross-functional, virtual, or a multiteam system?
  - Team charter, team composition and team processes: who is in it, what they agreed, and how they actually work.
- **The concepts that explain what goes wrong on screen**
  - Roles, the psychological contract, and role conflict.
  - Norms, conformity and deviant workplace behavior.
  - Status, cohesion and group size: a cohesive team is not automatically a productive one.
  - Groupthink: the decision nobody in the room stopped.
  - When the organization should have used individuals instead of a team.
- **Name specific scenes. A concept without a scene from your documentary earns nothing.**
