SUBJECT DESCRIPTION

This course is designed to allow students to gain knowledge, insights and analytical skills related to how a firm's managers go about designing, implementing, and using planning and control systems to implement a firm's strategies. Among these management control processes, we find budget planning, evaluation of the performance of business units, transfer pricing and management of profit centers.

LEARNING OBJECTIVES

- Understand the different types of responsibility centers which can be found in organizations.
- Understand transfer pricing within organizations.
- Elaborate income and cash budgets and evaluate how results depart from those budgets.
- Learn about key unit performance indicators.
- Allocate environmental costs to products/services.
- Learn about environmental performance indicators.

TEACHING METHODOLOGY

IE University teaching method is defined by its collaborative, active, and applied nature. Students actively participate in the whole process to build their knowledge and sharpen their skills. Professor's main role is to lead and guide students to achieve the learning objectives of the course. This is done by engaging in a diverse range of teaching techniques and different types of learning activities.

Learning Activity	Weighting	Estimated time a student should dedicate to prepare for and participate in
Lectures	24.0 %	30.0 hours
Discussions	16.0 %	20.0 hours
Exercises in class, Asynchronous sessions, Field Work	24.0 %	30.0 hours
Group work	16.0 %	20.0 hours

Individual studying	20.0 %	25.0 hours
TOTAL	100.0 %	125.0 hours

AI POLICY

#1 – Critical GenAI use is encouraged

In this course, the use of generative artificial intelligence (GenAI) is encouraged, with the goal of developing an informed critical perspective on potential uses and generated outputs.

However, be aware of the limits of GenAI in its current state of development:

· If you provide minimum effort prompts, you will get low quality results. You will need to refine your prompts to get good outcomes. This will take work.

· Don't take ChatGPT's or any GenAI's output at face value. Assume it is wrong unless you either know the answer or can cross-check it with another source. You are responsible for any errors or omissions. You will be able to validate the outputs of GenAI for topics you understand.

· AI is a tool, but one that you need to acknowledge using. Failure to do so is in violation of academic honesty policies. Acknowledging the use of AI will not impact your grade.

Suggested format to acknowledge the use of generative AI tools:

I acknowledge the use of [AI systems link] to [specify how you used generative AI]. The prompts used include [list of prompts]. The output of these prompts was used to [explain how you used the outputs in your work].

If you have chosen not to include any AI generated content in your assignment, the following disclosure is recommended:

No content generated by AI technologies has been used in this assignment.

RE-SIT / RE-TAKE POLICY

*Each student has **four** chances to pass any given course distributed over two consecutive academic years: ordinary call exams and extraordinary call exams (re-sits) in June/July.*

***Resits:** Students failing the course in the ordinary call (during the semester) will have to re-sit the exam in June/July.*

*Those students who have not complied with the **80% attendance rule** during the semester will fail both calls for this Academic Year (ordinary and extraordinary) and will have to re-take the course (i.e., re-enroll) the following Academic Year, by paying the corresponding extra cost.*

*The June/July re-sit exam will consist of a comprehensive exam. Your final grade for the course will depend on the performance in this exam only; continuous evaluation over the semester will not be taken into consideration. Students will have to achieve the minimum passing grade of 5 and can obtain a maximum grade of **8.0 (out of 10.0)** in the re-sit exam.*

***Retakers:** Students who failed the subject in a previous Academic Year and are now re-enrolled as re-takers in a course will need to check the syllabus of the assigned professor, as well as contact the professor individually, regarding the specific evaluation criteria for them as retakers in the course during that semester (ordinary call of that Academic Year). The maximum grade that may be obtained in the retake exam (3rd call) is 10.0*

*Retake students in undergraduate programs are **generally** not required to attend classes; **however, certain courses may still apply attendance requirements depending on the course methodology or specific learning objectives**. Each syllabus clearly indicates whether attendance is mandatory or not for retake students. Therefore, it's always the student's responsibility to make sure to **check the syllabus for the specific conditions for retake students** and to **contact the professor at the start of the semester** in order to find out what is required of him /her to best prepare for the retake and to pass the course. This is very important since each professor has his/her own specific requirements.*
