CASE COMPETITION INSTRUCTIONS

This is an interesting exercise were we are going to ***apply everything that you have learned during the sessions to a successful company****. You are going to* ***work in teams as a group of strategic consultants****.*

1. Content of the Presentation:

The presentations will have a fixed index. So, the **number of slides and the index for all the groups is the same and comparable**. *If any group doesn´t follow this index, they will be disqualified*. It is not possible to do more or less slides. This is the index for all the groups:

Slide 1: **Case study**; **Group number**; **Mame of students**.
Slide 2, 3: Company Presentation and **Mission**, **Vision**, **Values**.
Slide 4, 5: **Industry analysis**: **Porter´s five forces** and **Key success factors**.
Slide 6, 7: **Segmentation analysis**: Porter´s five forces and Key success factors.
Slide 8: **Blue Ocean Strategy**.
Slide 9: **Conclusions on industry** and **segment** analysis.
Slide 10, 11: **Key Resources**, **Capabilities** and **VRIO analysis**.
Slide 12, 13: **Competitive Advantage**.
Slide 14, 15: **Industry Life cycle** & Innovation.
Slide 16, 17: **Vertical Integration** & **Diversification**.
Slide 18 to 20: **Strategic Conclusions** & **Future Recommendations**.

Total maximum time for class presentation: 20 minutes
It is compulsory to do exactly 20 slides and follow this index for each slide, so all the group presentations are comparable.

I recommend that the slides have enough content so they can be graded by reading them, but at the same time, they must be right for the presentation. Too much content will damage the presentation. **You should present the same presentation slides that you have uploaded to the assignment**.

2. GROUP ASSIGNMENT?

1.- Assignment of a Company for the case study →

Group 1: Case Amazon

Group 2: Case Apple

Group 3: Case Netflix

Group 4: Case Google

Group 5: Case LVHM

If any group would like to do the case study about a different company, please send me an email, before beginning the assignment. All the groups must work with a different company, so the class learns about different case studies. **If two groups have the same case, both will be disqualified**.

2.- Work on the assignment by groups →

Please, work on the presentation of the case competition with enough time. This assignment will take time to do it in a proper way.

If any group wants to ask me anything about the case competition, I will be available before or after each class or by email.

3.- Upload the assignment to BU → 24 hours before the class presentation

Doesn´t matter when you are presenting, all the groups must upload the presentation 24 hours before the assignment deadline. It won´t be fair that groups that present after have advantage.

Please upload to BBU the final presentation in **PDF format**, always before the deadline. Also, please, send me the presentation on **Power Point format** by **email** if it is possible.

4.- Case Study Presentations →

The groups will present in the order of their number group. All the groups must upload the presentation before the work assignment deadline.

Groups must be very precise with the use of time, so all the groups have the same use of the presentation time.
When the presentation time is finished, professor will conclude the group presentation, to guarantee same opportunities for all groups presenting.

3. Grading:

The grading will have two parts:

1. **The professor will grade the presentation on a competitive basis.**

2. **Each student will grade all the group presentations on a competitive basis.**
   Collusion agreements between groups will be penalized.
   Please, grade according to the

1) COHERENCE with the theory (e.g. right use of the terminology, alignment with the theoretical content, justifications from a strategic and economic viewpoint of your statements and solutions…)
2) BUSINESS FEASIBILITY (e.g. importance of the data and sources collected) and conclusions.

Hope you enjoy this exercise and learn a lot during these group work sessions.

Thanks, Best!

Ricardo Lopez
